GerberColor Process Pro – CMYK Foils

Custom-formulated, resin-based, semi-gloss foils for four-color process prints, process color simulations of solid PANTONE® colors, EDGE Match™, and photographic bitmap reproductions. Three-year exterior life performance. Use with GerberColor Spectratone to produce additional colors. Warranted as specified when used on Gerber-approved EDGE READY materials.

GerberColor Transparent Foils

Custom-formulated, resin-based, transparent color foils will provide three-year exterior life performance. The unique transparent feature allows the characteristics of the base EDGE READY material to come through. GCT foils should be double-hit for best backlit results. Use with GerberColor Spectratone to produce additional colors. Warranted as specified when used on Gerber approved EDGE READY materials.

GerberColor SpectraTint and SpectraShade Foils

GerberColor Spectra foils are designed for overprinting to modify the appearance of base color foils. Use these foils to produce a wider range of EDGE-printed spot colors, to better match hard-to-hit corporate identity program colors or to create special shading effects on shapes and large text. All effects are achieved with solid fill printing.

SpectraTint has been designed to lighten the appearance of the base color, while **SpectraShade** will darken it. Both foils have been formulated for outdoor use for up to three years. Spectra foils can triple the range of spot colors that are printable with a shop’s current inventory of foils.

GerberColor Special Effects Foils

GerberColor Special Effects (GCX) Series Foils are specifically designed to produce dramatic and eye-catching graphics. NOTE: Interior use only. The vibrant colors of the GCX Fluorescent line are an excellent choice for creating point-of-purchase displays, safety signage, promotional items, and any interior application that calls for high visibility graphics.

GerberColor Finishing Foils

Abrasion Guard™ SPF is designed for graphics likely to experience repeated handling or frequent contact. This clear overprint GerberColor foil makes GERBER EDGE-produced graphics considerably more resistant to abrasion, **plus it adds up to 30% longer UV protection to any EDGE output!**

GCF Matte Clear foil enhances the readability of the resulting graphic in applications that require optimum clarity. Designed to reduce the gloss level of printed graphics by up to 60 percent it may also be used as a decorative foil to add a finishing touch to graphics or to “de-gloss” colored vinyl to achieve a matte finish.

180 3M Controllac Plus	15" Punched EDGE READY	
Color, Color Code	10 Yard	50 Yard
White 180-10	P34703A	P34704A

Gerber 180 3M Controllac Plus is a high performance, 2 mil, gloss vinyl which features pressure-activated adhesive to simplify application of graphics on flat, corrugated and riveted surfaces. Its pigmented adhesive provides maximum color opacity. Six- to seven-year exterior life.

[Gerber 180 3M Controllac Product Bulletin](#)

250Cv2 3M™ Controllac™ Film with Comply™ Adhesive

250Cv2 3M Controllac	15" Punched EDGE READY	
Color, Color Code	10 Yard	50 Yard
White 180-10	P82098A	P82099A

Gerber 250Cv2 3M Controllac with Comply Performance is a 2 mil, repositionable vinyl graphic film with a grey-pigmented, pressure-sensitive adhesive which allows for optimum color opacity. Custom-formulated exclusively for Gerber, its unique construction is designed to eliminate air bubbles to make graphic application fast and easy. The Comply Performance feature of Series 250 allows air to easily escape through

micro-replicated channels under the film's surface for easier application. Ideal for large graphics over corrugated and riveted surfaces such as tractor trailers, buses, and other fleet graphic applications, Series 250 can be used on a wide variety of substrates including ABS resins, aluminum, chrome, glass, fiberglass reinforced plastics, painted surfaces and flat or simple curved surfaces, with and without rivets. This film is not recommended for use on stainless steel, non-3M films, or substrates that do not have a clean, smooth surface or have poor paint-to-substrate adhesion. It is also not intended for applications where petrochemical contact may occur.

Gerber PermaGrip Film

PermaGrip	15" Punched EDGE READY	
Color	10 Yard	50 Yard
White	AP75517 -10y	AP75517 -50y

Gerber PermaGrip is a durable, permanent cast vinyl film for use with Gerber EDGE Systems and GerberColor foils. It is dimensionally stable and has an extremely aggressive pigmented adhesive system that provides superior hiding power when applied over colored surfaces. Gerber PermaGrip is edge-stripped to eliminate buildup of adhesive

residue on sprocketed equipment. Gerber PermaGrip is ideally suited for a wide variety of commercial, industrial and safety applications. It can be used to create interior and exterior labels, emblems, logos and signs on many surfaces including, flat, moderately compound curved and moderately-rough surfaces and some low surface energy materials. The user should determine the suitability of all substrates prior to actual application. This film is not recommended for use on corrugated, riveted or highly irregular surfaces. It is not recommended for flexible sign face or flexible banner material. It is also not intended for applications where petrochemical contact may occur. If petrochemical exposure is anticipated, refer to the Product Bulletin for information on protecting graphics.

[LexEdge FR65 Product Bulletin](#)

Gerber **LexEdge Clear**

LexEdge Clear	15" Punched EDGE READY	
Color	10 Yard	50 Yard
Clear	P67002A	P67003A

LexEdge Clear is a clear, polished 10 mil Lexan material, designed for use with the Gerber EDGE. A polished version of our current LexEdge II product, LexEdge Clear provides a perfect tool for creating architectural signage, point-of-purchase displays, exhibit graphics, and membrane switch applications. In order to protect its polished surface, LexEdge Clear has a removable, protective mask on the print side of the material for optimal output.

[LexEdge Clear Product Bulletin](#)

Gerber LexEdge Outdoor

LexEdge Outdoor	15" Punched EDGE READY	
Color	10 Yard	50 Yard
Matte	P72790A	P72791A

Outdoor durable, this semi-rigid, matte, 10-mil Lexan has a custom-formulated print surface specifically designed to resist tearing, abrasion and yellowing effects of UV exposure. Formulated for use with the Gerber EDGE for printing directly onto the final substrate in second surface applications. Ideally suited for the production of ATM/bank, equipment labels, gas station graphics, menu boards and other outdoor graphic displays. Vertical exterior performance life of 3 to 5 years.

[LexEdge Outdoor Product Bulletin](#)

Gerber PVC-10 Shelf and Tag

PVC 10	15" Punched EDGE READY	
Color	10 Yard	50 Yard
White	P81132A	P81133A

PVC-10 Shelf and Tag is a white, 10 mil, semi-rigid PVC material. It has been custom formulated for use with Gerber EDGE Systems that use EDGE READY Materials and GerberColor Foils. PVC-10 Shelf and Tag can also be decorated with cut-vinyl graphics.

The semi-rigid construction of PVC-10 Shelf and Tag makes it ideally suited for a number of non-pressure-sensitive applications including signs, menu boards, point-of-purchase displays, permits, identification tags, and door hangers.

Gerber **Gerber Guard™** – Overlamine manufactured by 3M

Gerber Guard	15" Punched	
Color	10 Yard	50 Yard
Clear	P61385A	P61386A

Not intended for printing. Gerber Guard is designed to provide additional protection from petroleum-based or other chemicals, as well as increased abrasion resistance due to exposure to severe handling conditions. Gerber Guard's glossy characteristic creates a more lustrous finish when applied to Gerber EDGE-produced graphics. May also be used on unprinted vinyl film with the same quality results.

[Gerber Guard Product Bulletin](#)

Gerber **UVGuard** – Overlamine

Gerber UVGuard	15" Punched	
Color	10 Yard	50 Yard
Clear	P83995A	P83996A

Not intended for printing. Gerber UVGuard is a 1 mil, clear, Tedlar® laminating film designed to further expand the resistance to weathering of graphics printed (or cut) on Gerber Series 220, 225, 280i with Gerber EDGE Systems and GerberColor Foils. Gerber UVGuard will also provide resistance to the effects of mildew and graffiti. The expected performance life will be improved to five years.

*The performance life of GerberColor Spot Pink (GCS-643) will not be affected by Gerber UVGuard.

[Gerber UVGuard Product Bulletin](#)

Gerber **UVGuard 9** – Overlamine

Gerber UVGuard 9	15" Punched	
Color	10 Yard	50 Yard
Clear	P84370A	P84371A

Not intended for printing. Gerber UVGuard 9 is a glossy 1 mil, clear, PVC laminating film with a graphic protection system top coat designed to further expand the resistance to weathering of graphics printed (or cut) on Gerber Series 220, 225, 280i films with Gerber EDGE Systems and GerberColor Foils. Gerber UVGuard 9 has the highest protection from UV fade. The expected performance life will be improved to nine years.

[Gerber UVGuard 9 Product Bulletin](#)

Gerber **StrikeGuard** – Overlamine

Gerber StrikeGuard	13" Unpunched	
Color	10 Yard	50 Yard
Clear	P76480A	P75963A

Gerber StrikeGuard is an extra-thick (8 mil), flexible clear overlamine designed to provide EDGE®-printed graphics with extreme protection from forceful impact. It has been developed as part of a great new system for producing helmet decals and for decorating "extreme sports" equipment, including recreational vehicles

Gerber **Routing Bits**

Gerber Gold™ Routing Bits

Gerber Gold routing bits are designed for greater performance and longer tool life. These remarkable routing bits are made from the highest quality micrograin carbide to the tightest tolerances in the industry. They are then coated with titanium nitride to enhance their durability even further. The result is superior edge quality and lower tooling cost. These high performance bits can be used with all Gerber routers/engravers, as well as with other automated and manual routers.

Two-Flute Spiral Bits

These are the most versatile type of bits and are used for general routing of the following materials:

- Harder Materials: Such as plate aluminum, brass, bronze, copper; cast acrylics, solid surface materials, particle board, plywood, and hardwoods.
- Softer Materials: Such as foam boards, engraving stock, PVC (Sintra®, Komatex, Trovicel®, Celtec, etc.) soft plastics, soft woods, and similar density materials.

These bits provide excellent chip removal from the cut because of the upward spiral action. They also assure excellent edge quality on these materials.

Shank Diameter	Cutting Diameter	Cutting Edge Length	Part Number
1/8"	1/16"	3/16"	P50521B
1/8"	1/8"	1/4"	P50525B
1/8"	1/8"	1/2"	P50522B
1/4"	3/16"	3/8"	P50526B
1/4"	3/16"	5/8"	P50523B
1/4"	3/16"	1 1/8"	P50528B
1/4"	1/4"	1/2"	P50527B
1/4"	1/4"	3/4"	P50524B
1/4"	1/4"	1 1/2"	P50529B
1/4"	1/4"	2 1/4"	P50530B
1/8"	1/8"	1 1/4"	P52819B

Single-Flute Radial Bits

These bits are ideal for cutting sheet aluminum and brass with a thickness of .060" (1.5mm) and less, as well as soft woods and soft alloy aluminum. Unlike the spiral flute bits, these bits have a single straight cutting edge which doesn't pull up on the work piece. This straight flute allows the bit to "shear" the chip off at the top edge of the material being cut without leaving a burr. The chip extraction, however, will not be as good as with a spiral bit.

NOTE: These bits are being phased out as inventory is depleted – please note the suggested replacement part numbers. Descriptions can be found on the next page.

Shank Diameter	Cutting Diameter	Cutting Edge Length	Part Number	Suggested Replacement
1/4"	1/4"	1 1/2"	P50535B	P80339A
1/4"	1/4"	3/4"	P50534B	P80338A
1/4"	1/8"	1/2"	P50532B	P80336A
1/4"	1/4"	3/16"	P50533B	P80337A

Gerber Routing Bits – continued

Three-Flute Spiral Tapered Bits

These bits can be used on all materials listed for the two-flute spiral bits. The difference is that the tapered bits give you an angle on the edge of the material being cut. As a result, these bits are excellent for cutting vacuum form molds.

Also, when you want something other than a straight edge for special applications, these bits can be used to create a "halo" effect without incurring additional cost.

Shank Diameter	Cutting Diameter	Cutting Edge Length	Part Number
1/4"	1/8"	1"	P50643B
1/4"	1/8"	1/2"	P50531B

Gerber Gold Specialty Bits

Gerber Gold Specialty bits take the guesswork out of choosing the correct bit for a specific substrate. Gerber Gold bit descriptions include an application code which identifies materials and applications for which the bit is most suited. To make life even easier, the application code is etched into the shank of the bit, along with the part number, for easy identification once the bit has been removed from its sleeve. See the application chart on next page for code descriptions.

Application Code	Shank Diameter	Cutting Diameter	Cutting Edge Length	Part Number

Application Reference Chart for Gerber Gold bits		
HPF	Hard Plastic & Foam	Solid Surface (Avonite™, Corian®), Cast Acrylic
APS	All Purpose Straight	Substrates with thin laminates, Foam boards (clay coated paper and styrene surfaces; Fome-Cor®, Gatorfoam®, Gatorplast®)
GP	General Purpose	Gerber Platinum series is a high performance tool for use with Hard and Soft Plastic, Hard and Soft Woods, Wood and Plastic Composites.
AW	Aluminum & Wood	Alucobond®, Diond®, Dilite®, Hardwood, Softwood, Non-Ferrous Metals (Aluminum, Brass, Copper)
LV	Laminates and Veneers	Produces clean top and bottom edges on single and double-sided laminated substrates. Hardwood, Softwood, Wood Composites (MDO, MDF, Plywood, Particle board)
F	Foams (Special Long)	Specially designed for thick foams and soft plastics from 1-1/4" to 2-1/4". HDU (Precision Board™, Signfoam®)
3DM	3D Modeling	Ball Nose bit designed for three-dimensional modeling. Advanced grind technology produces a superior cut in plastics, woods composites and aluminum.
APC	All Purpose Cleanout	Produces a clean bottom finish with a .002" radius inside bottom edge. HDPE (Polycarve™), Aluminum, Woods, Solid Surface
FT	Folding Tool	Carbide tipped specialty bit designed for folding Alucobond®, Diond®, Dilite® up to 90-degrees.
SPF	Soft Plastic & Foam	PVC Foam (Celtec®, Trovicel®, Sintra®, Kometex®), HDU (Signfoam®, Precision Board™), Extruded Acrylic, Styrene, Polycarbonate (Lexan), HDPE (Polycarve™)

Auto-Carve™ 3D Carving Bits

Gerber V-cutting carbide bits deliver superb cut quality, maximum cutting efficiency, and the longest possible tool life. These specifically designed tools are produced within extremely tight manufacturing tolerances, ensuring the level of accuracy essential to the automated carving process.

Design considerations that impact tool selection:

For Small, Intricate Graphics with Thin Stroke Widths: Choose a tool with a steep angle, such as the 90° tool.

For Large Graphics with Wide Stroke Widths: Choose a tool with a shallower angle, such as the 150° tool.

Shank Diameter	Tool Diameter	Tool Degree	Part Number
1/4"	1 1/4"	100°	P56372A
1/4"	1 1/4"	110°	P56373A

1/4"	1 1/4"	140°	P56376A
1/4"	1 1/4"	150°	P56377A
1/4"	1 1/4"	90°	P56371A

Gerber Routing Bits – continued

Gerber Engraving Bits

Gerber also offers high quality, long and short type industry standard engraving bits. Designed to give excellent results with Gerber equipment, they also work with other routers/engravers. Gerber engraving bits are ideal for applications using Dimension Plus®, ROWMARK®, acrylic, polycarbonate, and other plastic materials.

Engraving Bits (Long Type)

These bits are for top-loading engraving spindles. Use with Gerber Engraver Options.

Shank Diameter	Cutting Diameter	Part Number
1/4"	.010"	P47767A
1/4"	.060"	P47775A

Engraving Bits (Short Type)

These bits are for bottom-loading collet systems. Use with Router Motor or High Frequency Spindle Option.

Shank Diameter	Cutting Diameter	Part Number
1/4"	.010"	P50536A
1/4"	.020"	P50537A
1/4"	.030"	P50538A
1/4"	.060"	P50539A
1/4"	.090"	P50540A

Other Gerber Specialty Bits

Braille / Tactile Bits

These bits are used to create ADA (Americans with Disabilities Act) compliant signs. All have shank diameters of 1/4" (6.0mm). The Long Type for use with Dimension 200®, ADVANTAGE Router™ 600 and Sabre™ Engraver Options. The Short Type has the same tip geometry as the Long Type, but are cut shorter for use in a Router Motor or High Frequency Spindle Option.

Gerber 220 High Performance Film manufactured by 3M

220 High Performance	7.5" Punched	
Color, Color Code		25 Yard
Black 220-12		P34843A
Matte Black 220-22		P34841A
Matte White 220-20		P83227A
White 220-10		P83245A
Color, Color Code		25 Yard \$135.02
Cardinal Red 220-53		P44284A
Intense Blue 220-47		P44282A

High performance 2 mil cast vinyl specifically developed for optimal GERBER EDGE-printing cutting, weeding, and application. Clear pressure-sensitive adhesive allows production of attractive two-way markings. Excellent durability with five to eight-year exterior life.

Gerber 280 Reflective Sheeting manufactured by 3M

280 Reflective	7.5" Punched	
Color, Color Code	10 Yard	
Black 280-85	P37352A	
White 280-10	P37353A	

Series 280 7.5 mil reflective sheeting is designed for markings requiring high visibility, both day and night. The material has good flexibility and provides excellent conformance to flat or moderately curved substrates. Seven-year exterior life on all colors; five-year exterior life on black.
