# HP Scitex Guide

for Supplies, Solutions and Services

HP is committed to your success. Your investment in an HP Scitex printing system is an investment towards success and growth.

To reach your business goals, you need your system to work with maximum productivity and cost effectiveness, all the time.

The HP Scitex portfolio spans industrial printing applications, production volumes, ink technologies, and printing formats to provide your print production business with the solutions you need.

The HP Scitex complete printing solutions have built a reputation for performance, quality, dependability and value. Our deep understanding of market needs and on-going investment in solution development enables advanced printing systems, solutions and services, providing the highest customer experience and enabling you to provide one of the best application solutions to your print buyers.

This document provides you with the complete set of supplies, services and solutions that you may require for your printing system, to enable smooth printing operation and provide your print buyers with one of the best in class applications.

## HP Scitex Printing Supplies

Designed for optimal printer performance and output quality, enabling best possible consistency, like all industrial inkjet printing systems, HP Scitex printing systems are a complex collection of electronics and electrical, mechanical and fluid-mechanical components. Each system is highly engineered, with each part calibrated to perform to a certain functional level in association with its other parts. Changing the calibration of one part of the system will impact the performance of other parts. HP Scitex inks have specific qualities and properties because they are developed and tested in conjunction with specific HP Scitex printing systems. While many third-party inks are designed for a particular printhead, HP Scitex inks are designed to work with the entire printing system; the printhead is just one factor among many, including the system's color reproduction software, screening, speed, drying process application, and more.

Because ink properties are critical to virtually every part of the printing system and affect print quality, productivity, and reliability, Original HP Scitex inks manufactured by HP are designed, tested, and developed with HP Scitex printing systems using approved media. Working together, they deliver optimal performance and value in Industrial printing solutions. While other inks may promise lower cost per liter, users must consider the total cost of production and how profit can be reduced by lower productivity, printer downtime and repairs, and the loss of the dependability of a solution developed, tested, and backed by HP.

## HP Scitex End-to-end Solutions

HP Scitex provides end-to-end solutions to more efficiently drive pages to press. The HP SmartStream Workflow portfolio for Scitex provides complete workflow solutions by HP and partners to enhance PSPs' flexibility and grow their profits. HP Scitex Print Care maximizes uptime with fast, efficient assistance for effective and timely routine preventative maintenance.

## HP Graphics Solutions Services

**HP offers a full range of support programs to help you effectively run your digital printing business – from support services, to training, production optimization and customized service programs.**

HP Graphics Solutions Services address the four key stages across the lifecycle of your HP Scitex printing equipment. Our goal is to help you get more return on your investment. In the first stage, our programs help you get production off to a strong start. In a second stage, a broad set of service and support programs are available to help you manage your ongoing printing operations and gain more efficiency. In the third stage, additional programs can help you optimize your production for increased performance and utilization, quality and cost-effectiveness. And in the fourth stage when you change your operating model or physical premises, HP Graphics Solutions Services are available to help ensure an efficient transition.

“Quite simply, the HP Scitex FB10000 Industrial Press reinforces our ability to serve the packaging and POS market. Our current business is split 60 per cent packaging and 40 per cent POS, and this investment will improve our service levels to a standard that competes with traditional analog technologies.”

– Nick Kirby, managing director, Swanline Print Ltd.

CD405A	HP DS100 1-gallon Specialty Textile Light Yellow Scitex Ink
CD406A	HP DS100 1-gallon Specialty Textile Light Black Scitex Ink

There are currently various series of inks for the HP Scitex XL printers:

- XL300 Supreme inks are 8 colors of pigmented solvent ink, formulated especially for the newer and faster versions of the XL1x00 printers. These inks offer high-speed printing as well as the long durability of the Supreme series.
- XL400 Supreme inks are 4 colors of pigmented solvent ink formulated especially for lower maintenance and better image quality, especially in solid areas. Although not as fast drying as the XL300 Supreme inks, the XL400 inks provide better throughput, since the maintenance (purging) time is reduced significantly (from once every 60-90 seconds to about once every 500 seconds). The ink's durability is, of course, like all other Supreme inks. For 8 colors use XL300 Supreme Light colors with XL400 Supreme 4 colors.
- DS100 Specialty Textile inks are 4 colors of dye sublimation solvent ink designed especially for textile printing. These inks can print on a variety of Polyester textile media, through a dual-process printing (printing on a transfer paper on the printer followed by heat transfer to the textile media on a dedicated transfer machine). This ink is used on the XL1500 DS printer.

**Ink coverage: XL300 Supreme:** 75 sqm/liter (at "billboard" mode, 4 colors)

**Outdoor durability:** XL300/400 Supreme: up to 24 months.

DS100 Specialty Textile: up to 3 months.

**Shelf life: XL300/400 Supreme:** 18 months from production date.

DS100 Specialty Textile: 12 months from production date.

#### Maintenance

**CN750A** HP MF10 25-liter Scitex Cleaner

#### Consumables

**CP219A** HP Scitex Xaar P128-200 4.25KHz Assy

The HP XL300 Supreme Scitex Ink is certified by 3M® performance warranty and by Avery® Integrated Component System (ICS) warranty (USA) and Supreme Cover (EU) when printed on the approved media from the corresponding manufacturer.

An approved MCS ink (with 5 year warranty) for these printers is also available from 3M Company.

CN746A	HP WB300 4-pack 3.8-kg Supreme Light Magenta Scitex Ink
CH789A	HP WB300 4-pack 3.8-kg Supreme Bright Yellow Scitex Ink

The HP Scitex FB6700 Press has one series of 6 colors, pigmented water-based inks, and two available pre-treatment solutions for use with different media: the PT10 is for cartons and foam-boards, while the PT20 is for plastic materials, such as vinyl and others. There are two versions of yellow ink – the “Bright Yellow” has an extended color gamut and fade resistance. The WB300 Supreme ink is odorless, nonflammable and nonreactive. The ink has been awarded the “Green Label” by the “Standards Institution of Israel” (SII), and a certificate by the German “Fraunhofer Institut für Verfahrenstechnik und Verpackung” (Institute for Process Engineering and Packaging) for compliance with food regulatory assessment requirements in Europe (EU-Directive 97/48/EC) and in the USA (FDA).

**Ink coverage:** 72 sqm/liter (at economy split).  
**Outdoor durability:** Up to 12 months.  
**Shelf life:** 12 months from production date.

# HP Scitex inks durability statement

# HP Scitex inks

## durability statement

HP Scitex inks are designed to give the customer cost effective ink that is the most suitable for their range of applications. These inks consist of high performance pigments and high quality raw materials; they are produced in a state-of-the-art manufacturing facility, and rigorously tested to assure their quality.

HP Scitex UV-curable and solvent based pigmented inks were tested in the laboratory for weather-fastness. This term relates to: color fading, water and moisture influence and printed image degradation. The tests are performed in accordance with ASTM D2565-99 or ISO 11341:1994 standards. Both methods are in fact an artificial, accelerated weathering test that uses a xenon arc as illuminant, filtered with Borosilicate Quartz to match the solar spectral output and intensity. In addition to the illuminant the test consists of temperature, light and dark and water spray (i.e., rain) cycles.

The inks listed below were tested in accordance with ASTM D2565-99, on 3M® Scotchcal™ IJ40-10 substrate and passed a test simulating 2 years vertical exposure in South Florida without significant color fading.

Solvent based inks:	UV-curable inks:
• HP XL400 Supreme Scitex Ink	• HP HDR240 Scitex Ink
• HP XL300 Supreme Scitex Ink	• HP TJ200 Scitex Ink
• HP TJ100 Supreme Scitex Ink	• HP TJ210 Scitex Ink
	• HP FB221 Scitex Ink
	• HP FB225 Scitex Ink
	• HP XP222 Scitex Ink

The inks listed below were tested in accordance with ISO 11341:1994 on 3M Scotchcal™ IJ40-10 substrate and passed a test simulating 2 years vertical exposure in Central Europe without significant color fading.

UV-curable inks:
• HP XP220 Scitex Ink
• HP FB210 Scitex Ink
• HP XP231 Specialty Billboard Scitex Ink

Best outdoor durability depends upon type of media used and will only be achieved with certain substrates. Fading in geographical areas other than the aforementioned will change due to different climatic conditions in these areas. HP cannot guarantee the outdoor durability for printing conditions, type of media, application and geographical location different from the specified conditions.

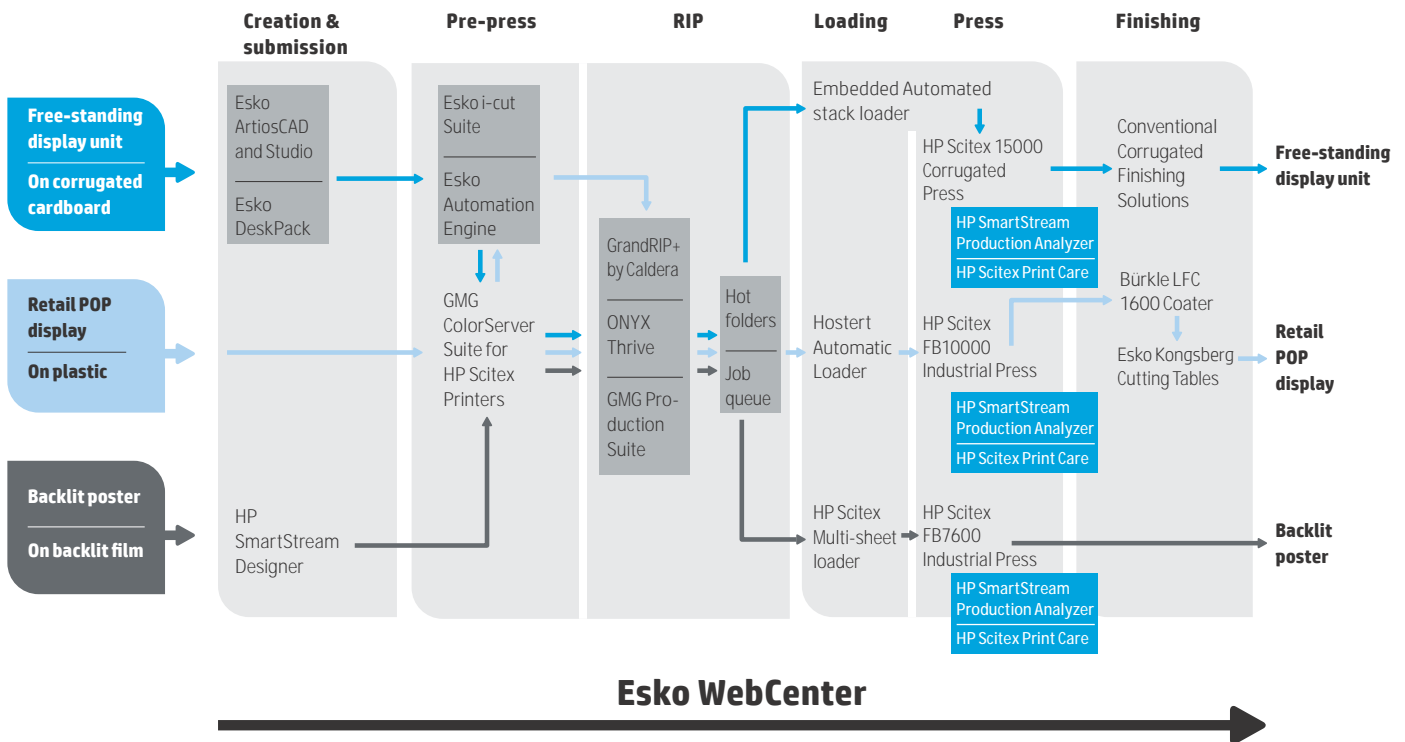

# HP Scitex Solutions

# HP SmartStream Workflow Portfolio for Scitex

The HP SmartStream Workflow Portfolio for Scitex provides complete workflow solutions – from job creation to fulfillment – to more efficiently drive more pages to press. HP and partners provide a portfolio of production workflow tools and solutions that enhances digital print service providers' and packaging converters' flexibility and helps them grow their profits. The workflow portfolio helps you overcome key production challenges in the modern print communications landscape.

- Helps to preserve profitability on short-run, low-revenue jobs by minimizing preparation and finishing time.
- Includes workflow components from job creation to fulfillment – designed to suit print service providers and packaging converters who want to increase end-to-end productivity by shortening job preparation time, from prepress through RIP, print and job finishing.
- Includes HP SmartStream Solution Navigator, an interactive tool, featuring HP SmartStream solutions, that helps print service providers and packaging converters identify complete workflow solutions for various applications. Available at [hpwsn.com](http://hpwsn.com)  
– Mobile version available

## Creation and order submission

### **HP SmartStream Designer**

Enables you to offer cost-effective versioned campaigns and variable data printing across a range of wide-format applications. It enables you to add personalized images, text, and colors from within Adobe® InDesign.

### **Esko ArtiosCAD and Studio**

Software applications improve the design of 2D and 3D graphics files to increase prepress productivity. Studio is a plug-in for Adobe® Illustrator® that allows the designer to work easily with 3D files, offering a 3D viewing environment where designers can see their artwork applied instantly to the file. ArtiosCAD is the world's most popular high-end structural design software, allowing a designer to easily build structural designs and 3D displays.

## Esko DeskPack

Deskpack is a collection of packaging prepress plugins for Adobe® Illustrator® and Adobe® Photoshop®. With these plugins, Adobe® Illustrator® and Photoshop® become a full-fledged packaging prepress application.

## Pre-press

### **GMG ColorServer Suite for Scitex Printers**

Includes GMG's ColorServer and SmartProfiler for HP Scitex printers. It optimizes color results for consistent, high-quality color prints.

### **Esko Automation Engine**

The Esko Automation Engine integrates and automates all design and pre-press activities in one workflow for HP Scitex presses providing a complete workflow for both digital and analogue printing devices. The Automation Engine reduces error rate and the need for operator intervention. It ensures increased efficiency and throughput, as well as saving time and money. The Automation Engine offers the following benefits and features:

- Job organization and data management
- Automated artwork creation & quality control tools
- Automated true shape nesting and step-and-repeat
- Integration with any MIS, ERP system as well as web portals
- 3D mockups and report generation
- Color management

### **Esko i-cut Suite**

Offers an end-to-end workflow solution that takes pain-points out of the entire process, from design, to print, to cut. The i-cut solution includes several modules:

- i-cut Layout is the Esko software that prepares your incoming files for both digital printing and digital finishing, producing reliable results independent of the RIP or printer. It automatically nests files in a unique way, thereby reducing material usage and preparation time for every job.
- i-cut Preflight means simple PDF preflighting for large-format digital printing. With dedicated production editing tools on board, i-cut Preflight prepares the file for printing and allows you to make last-minute corrections.
- i-cut Automate is a powerful and scalable, yet easy to use, workflow automation server. It integrates all design and production components in one workflow.

## RIPS

### **Caldera GrandRIP+, ONYX Thrive and HP Scitex GMG Production Suite RIPS**

Simplify everyday printing tasks, giving you greater control over your workflow.

## Loading

### **Embedded Automated stack loader**

The Automated Loader, which is built in the HP Scitex 15000 Corrugated Press makes the loading process easier and faster.

### **HP Scitex Multi-sheet Loader Kit**

Allows simultaneous printing of up to 4 pre-cut sheets, with either right or left alignment, reducing turnaround time and waste by eliminating cutting.

### **Hostert Automatic Loader**

An automatic media loader to enhance productivity and enable stack to stack operations.

## Press

### **HP SmartStream Production Analyzer**

Increases efficiency through deeper understanding of your production performance and trends. Full, automated monitoring of your print production enables deeper insight into your single- or multiple-unit environment in order to help decrease waste, improve margins, increase workforce efficiency, reduce printer and personnel downtime, and to obtain a better sense of your costs<sup>1</sup>. Real-time and historical visibility into your printer activities determine if you use your presses to their fullest potential.

<sup>1</sup> This is an SaaS application and requires a purchased license. It does not require installation on site. HP Print Care is a prerequisite to using the HP SmartStream Production Analyzer.

## Finishing

### **Esko Kongsberg Cutting Tables**

Offer state-of-the-art flatbed cutting tables for short-run finishing that come in multiple sizes. They enable fast, accurate, and flexible finishing across a wide range of materials.

### **Bürkler LFC 1600 Coater**

Provides image enhancement and protection on a variety of substrates, including corrugated cardboard, composite panels and foils<sup>2</sup>. A roll-to-roll option is available.

## Esko WebCenter

WebCenter is a powerful web-based Management platform to manage your business process, approval cycles and digital assets. The collaboration tools in WebCenter help to enhance the communication between all partners in the packaging and printing supply chains. Work virtually, in real-time, with your internal creative, marketing, package design and engineering groups, external vendors and suppliers.

## Enhance your productivity with HP Graphics Solutions Services

HP Graphics Solutions Services offers you the broadest portfolio of proven service programs to keep your business running productively. Our certified service teams are committed to meeting your end-to-end needs, driving your business productivity and sustainability for a profitable printing operation. Learn more at [hp.com/go/scitexservice](https://hp.com/go/scitexservice)

<sup>2</sup> Not available in all regions, please consult with your HP sales representative.

## HP Scitex Print Care

Maximize your uptime with a new level of service from HP. HP Scitex Print Care is the industry-leading set of tools and services that provide fast, efficient assistance for effective, timely routine preventative maintenance.

- Remote Assistance using Callme@HP - Our remote assistant is ready and waiting to dialog in real-time using a chat tool to provide remote assistance service and support. Through this service, the remote HP technician uses a camera to look at your printer, sees diagnostic results, and views historical data to help complete maintenance and reach a resolution. This service is designed to be like virtually working side-by-side<sup>2</sup>.
- Diagnostic Tool<sup>1</sup> - The diagnostic tool evaluates various printer components and pinpoints potential problems. The operator or your HP technician can initiate the tool. Or it can be set up to automatically schedule or pre-schedule diagnostic analysis.
- Calibration Tool<sup>1</sup> - Complete accurate printer calibration with this set of procedures specific to the printer platform.
- Backup and Restore<sup>1</sup> - Backup and restore selected files, defined by the administrator on site, to enable a quick recovery in case of a system failure.
- Troubleshooting for diagnostics<sup>1</sup> - Once diagnosis is complete, this enhanced troubleshooting tool provides instructions for resolution.
- Maintenance Scheduler - Receive alerts when it's time to initiate routine maintenance. When timely maintenance is complete, the software indicator schedules the next maintenance reminder. In addition, this tool keeps a maintenance history report and records system events, errors, and messages in a local database.
- Maintenance Wizard<sup>1</sup> - This friendly wizard guides you through each maintenance task by describing the relevant parts and providing instructions on how to perform the task using text, images, illustrations, and video clips.
- Messages Log<sup>1</sup> - View a log of all messages and events that were generated or occurred during printer operation. The messages can be sorted by substrate type, print mode, and subsystem. Predefined filters find trends when the messages occurred. And each message includes one-click access to instructions for resolution.

<sup>1</sup>This feature is not available on all printers. Please contact your sales representative for further information.

<sup>2</sup>The remote HP technician may work directly with your operator, or with your HP Authorized Channel Partner.

"I have just invested in an HP Scitex printing equipment, and need to start printing as quickly as possible."

#### Site Assessment

#### Installation

#### Operator L1 Training

#### Engineer Training

#### Ramp -Up

## Get Started

### Support Services

#### Site Assessment

HP Graphics Solutions Services work with you to prepare your site for the HP Scitex printing equipment. A comprehensive site survey is conducted to ensure the various aspects of the installation are planned in detail. This takes into account power requirements, environmental controls, site access, networking and other factors to streamline installation and ensure optimisation of the production environment.

#### Installation

A successful installation relies on careful planning. During the installation a team locates and installs the press/prINTER, performs all necessary adjustments, and brings it to full operational level. The team prints a suite of test prints to verify everything is in optimum working order, and draws up a Completion of Installation (COI) form for your approval. Once this is completed, the press/prINTER is ready to ramp-up to full production.

### Training Services

HP Graphics Solutions Services offer a comprehensive training curriculum that provides the knowledge and skills necessary to utilise the full capabilities of the HP Scitex printing equipment. Our training programmes emphasise hands-on practise in a professional learning environment. Courses taught at our HP Scitex Training Centre are also available onsite at your location.

Courses offered include:

- **Operator level 1 Training** - This training programme is designed for new HP Scitex printing equipment operators, to enable them to use the press/prINTER safely and to independently perform maintenance routines. Operator Level 1 training includes certification CSR<sup>1</sup> level 1.
- **Engineer Training** - This training programme is designed for experienced operators and engineers, to train them on diagnostics, and service and repair routines of HP Scitex printing equipment.
- **Operator Level 2 Training** - This training programme provides advanced training and knowledge to experienced operators on the principles of production optimisation. The main goal is to optimise usage of the press/prINTER, such as how to perform diagnostics, utilise advanced printing methods, optimise media and ink, and perform basic troubleshooting.
- **RIP- ONYX and Caldera Training** - This training programme is intended for HP Customer Engineers, as well as press/prINTER operators with some application knowledge, to enable them to install, maintain and solve relatively simple problems with the RIPs.

### Productivity Services

Productivity optimisation services are provided during a customised onsite visit by an HP Production Specialist, who works closely with both operators and management to optimise best practises for press/prINTER operation, maintenance, and press/prINTER consumables optimisation.

**Ramp-up.** This programme focuses on increasing the press/prINTER and DFE (Digital Front End) operator's knowledge level by providing hands-on experience, discussion of the production flow required on the customer's site, and troubleshooting of the HP Scitex printing equipment. The HP Scitex Production Ramp-up programme is a mentoring and training programme specially designed for new printing businesses or businesses with expanding production capacity.

<sup>1</sup> CSR Customer Self Repair

"I need a predictable business operation, and to reduce the risk of unplanned downtime."

**Service & Support Agreements**

**Uptime & Maintenance Kits**

**Preventive Maintenance**

**Operator L2 Training<sup>1</sup>**

**RIP - ONIX & Caldera<sup>1</sup>**

## Manage Printing

### Support Services

HP Graphics Solutions Services offer a full line of **Service and Support Agreements** for HP Scitex printing equipment. These are divided into three main programmes: Full Maintenance Support, Shared Maintenance Support and Parts & Remote.

#### Full Support

Designed for high-end customers the Full Support programme provides first-rate all-inclusive coverage post standard warranty period. Programme includes unlimited remote support and next business day Onsite Support response and covers all travel expenses, spare parts, and preventive maintenance.

#### Shared Maintenance

Designed for customers to maximise press/prINTER uptime by enabling customer self-repair and maintenance tasks and reduces cost of ownership. The Shared Maintenance programme includes unlimited remote support, customised number of annual onsite visits, second business day support response, onsite labour and spare parts. The Inclusion of Level 2 annual training is optional.

#### Parts & Remote

Designed for customers who are looking for a cost effective entry-level service programme as parts insurance. Parts & Remote with unlimited remote support and spare parts included.

Each programme includes a combination of Remote Support and Onsite Support:

**Onsite Support.** When problems cannot be solved remotely, a qualified HP Customer Engineer will be dispatched for an onsite visit. To minimise downtime, the remote HP Care Centre will inform the Onsite Support Engineer in advance about his diagnosis and organise shipment of spare parts needed.

**Remote Support.** The remote HP Customer Care Centre offers email and telephone support delivered by experienced HP Customer Engineers during normal business hours. In addition, HP's remote support includes **HP Scitex Print Care**, an industry-leading toolset providing fast, efficient assistance in two key areas:

- **Routine Maintenance** - Using remote HP Scitex Print Care tools an HP Customer Engineer can remotely examine your press/prINTER and view data to help resolve a problem, while discussing it in real-time with your operator.
- **Remote Troubleshooting** - The remote engineer employs enhanced diagnostics to offer your operator step-by-step guidance towards issue resolution. It's practically the same as working side-by-side.

#### Uptime & Maintenance Kits

The **Uptime kit** is an onsite inventory of the most frequently needed essential parts. Designed for customers working on multi-shift production, who want to optimise and reduce downtime. With Certified Advanced Operators capable to replace parts with remote guidance.

The **Maintenance Kit** is a set of consumables and parts, most frequently needed for preventive maintenance cycles. Designed to help customers to achieve higher print quality and reduce cost of ownership and unexpected expenses.

#### Preventive Maintenance

Preventive Maintenance programme is tailored for HP Scitex printing equipment owners, to help them achieve higher printing quality and reduce cost of ownership and unexpected expenses.

<sup>1</sup> Description of programme on page 4

"My HP Scitex printing equipment runs well, but I need more productivity, and to reduce the total operating costs per print."

**G7™  
Implementation<sup>1</sup>**

**Colour  
Management**

**Peak Season<sup>2</sup>**

## Optimise Production

### Productivity Services

HP Graphics Solutions Services offer a wide variety of productivity optimisation programmes for HP Scitex printing equipment. With these services, we help you proactively increase uptime, optimise performance and maximise every minute of print capacity.

**G7™ Implementation<sup>1</sup>.** These services are intended for HP Scitex printing equipment owners who need HP to implement a manageable solution customised for their workflow. HP G7™ Experts will help you understand how you can benefit from using the G7™ method and implement a manageable solution customised for your workflow.

**Colour Management.** These services are designed for customers who want to optimise media calibrations by a comprehensive Colour matching process using ICC profiling. This service is provided onsite.

### Support Services

While regular HP Scitex printing equipment support contracts consistently deliver the highest standards, enhanced service coverage during business critical periods is sometimes required.

**Peak Season<sup>1,2</sup>.** These services are designed for HP Scitex printing equipment owners who need HP to perform onsite or remote support outside of standard hours during peak production periods.

<sup>1</sup> Available only in the Americas.

<sup>2</sup> Requires prior agreement and confirmation with HP Services

“My production needs have changed, and I need to reposition or relocate and get my HP Scitex printing equipment ready for production.”

Relocation

Recertification

## Manage Change

### Customised Services

#### Relocation Services

Relocation Services coordinate the resources needed to reposition HP Scitex printing equipment. A multitude of options are covered: across the room, across the country or around the world; from a single printing system to a network of printing systems. You will be given one point of contact to reduce complexity, minimise risk and keep disruption to a minimum.

#### Recertification Service

HP Scitex printing equipment which is not under warranty or a service contract can be placed under an HP service agreement after they have been inspected and approved. Once the press/prINTER service agreement has been activated, HP will rebate a portion of charges for the inspection visit and repairs (parts and labour).
