MagnAbracket
Corrugated Plastic Mounting Bracket

Turn your "SignAbracket" into a magnetic mounting bracket for your corrugated plastic signs and substrates. These unique rare-earth magnets screw directly onto the "SignAbracket" so you can use them to create positionable signage for most metal surfaces like non-moving vehicles, pallet racking, steel posts and poles. Strong enough to mount as a vertical mount or horizontal mounting base. For larger signs, just use more MagnAbrackets. Sold in 2 magnet paks.

Part#	Description
SABMAG2	Magnets 2-pack

signclip™
FOR MOUNTING CORRUGATED PLASTICS

View of mounted clip from backside
(Zip strap not included)

Our SignClip™ are two piece plastic clips which, when locked together through the top and bottom of a 4mm - 6mm corrugated plastic substrate, provides secure damage-free mounting and ideal display positioning.

The transparent front bracket has two self-penetrating spikes which are pressed through the board and lock into the back spring clip securely. The back spring clip incorporates two spring and two rigid feet for maximum grip around your pole to prevent the sign from slipping down or moving after mounting. Multiple mounting methods enable attachment of the sign to any surface such as poles, rails, chain-link, or even flat fences and walls. This innovative easy to use SignClip bracket is small but offers huge benefits to signmakers and their clients needing a pole mounting solution for corrugated plastic flute board, and it greatly increases the life of your sign!

Kit Includes:
Super clear front bracket, back locking spring clip.
(36" Zip strap not included)

Use 36" Zip Ties for larger Post Mounts

Super clear front bracket doesn't distract from your message!

Wind Rider

SPINNING CORRUGATED SIGNS

Part# WR25
(25 pack)

Add eye catching movement to your corrugated signs and get more attention immediately.

Do you use corrugated signs to spread the word about your business or campaign? What if you could make your signs more attention grabbing? With Wind Rider, you can do just that. The Wind Rider adds a motioning call-to-action to 4mm corrugated plastic signs. The Wind Rider is a small but sturdy double-sided, three-pronged coro mount that slips into the flutes of 2 corrugated plastics signs, one placed on top of the other. When the wind blows, (if lower sign is mounted into a frame or base) the upper sign spins. The Wind Rider is ideal for people who regularly make use of lawn signs or real estate signs including contractors, realtors, politicians and low cost roadside promotions and directional signage.

Made In the U.S.A.

- Easy to use
- Affordable
- Reusable
- Attention grabbing
- Operates for Free
- Sturdy

For use with corrugated plastic sheets

Simply push into both top & bottom sheets

Easily spins in the wind

Banner Trak Parts

Doing large jobs or a unique banner application?

Pick -N- Choose your parts below to build almost any application you can think of.

Made In the U.S.A.

PART	DESCRIPTION	HOW TO USE
BT-1001 4' Banner Trak Rail	Use multiple traks to build any size indoor or outdoor banner you need. Use other parts below to attach your trak as needed. Sold individually	
BT-1002 Connector	Great for connecting Banner Trak rails together to build your custom size. Sold individually	
SSPIN Stainless Steel Pins	Use these pins to directly connect 2 48" or 24" BannerTraks together. Should only be used when mounting BannerTraks directly to a wall or substrate so the BannerTrak will stay securely fastened in place. Connector Pins help keep your BannerTrak in alignment for those long banner applications.	
BT-1003 Slider w/thumbscrew	Use these sliders on Banner Trak & slide them anywhere on the trak to align with your banners grommet, then screw the thumbscrew thru the grommet hole to lock it into place. Works with any #2 metal/#3 Clear & White Grommets. Sold in packs of 2 sliders & 2 thumbscrews per set.	
BT-1004 Slatwall Kit	Use these Slatwall clips with Banner Trak to easily attach to slatwall. Simply bolts on using the included screws for an easy mounting solution to slatwall installations. 1 pack includes 6 plated hooks with screws.	
BT-1005 End Caps	Use these end caps on Banner Trak rails for a finished appearance. Great for close range viewing and in high-end retail and industrial installations. 1 pack includes 2 end caps.	
BT-1006 Universal Mount Kit	Use these clamps for installing your Banner Trak onto pole and drape at trade shows and pole fence applications. It clamps to/under tables for table skirts or even horizontally to your cutting table to hold banner blanks flat and taut while applying your letters and graphics. 1 kit includes 1 pair clamps and hardware	
BT-1007 Suction Cup Kit	Use these suction cups with Banner Trak to mount to any glass or other smooth surface. Great for window graphics and displays that need constant changing. Have one message on the outside of the window and another message for the inside. 1 kit includes 6 suction cups with screws. 2 ¼" Diameter Cup

PART	DESCRIPTION	HOW TO USE

Made in the U.S.A.

BT-1008
T-Bar Ceiling Hooks

The perfect solution to all those drop down ceiling installations. Attach the left and right sides onto the drop down ceiling bar to make a complete and secure hook and then use wire, string, chain or hang rods to complete your installations. Be sure to see our BT-1009 and BT-1014 Hang rods for use with these hooks. BT1008 pack includes 10 hook sets.

BT-1009
6" Hang Rods

Use these hang rods whenever you are doing a ceiling or drop down installation. Hang one banner on top of another and don't forget to look at the BT-1014 12" hang rods and the BT1008 T-Bar Ceiling Hooks for the most professional installation look with drop down ceiling installations. Sold as 1 package of 50 hooks.

BT-1010
90° Super Bracket

Use these super strong 90 degree angles with Banner Trak or other sign mounting applications to hang your projects on shelves, posts or walls. Sold as each, buy as many as you need.

BT-1011
Multi Media Clip

Use these super strong multi-media clips with Banner Trak sliders & thumbscrews or other sign mounting applications to hang your projects on shelves, posts or walls. Sold as each, buy as many as you need.

BT-1012
Xtender

Use this easy connector to extend your Banner Trak to as long as you need. Make long Banner Trak projects more secure and stable by sliding both traks into place and then screwing them secure. 1 pack includes 1 extender, 2 hex head screws and hex key tool.

BT-1013
24" Connector

Use this extender to attach to the 4 foot rails to even out your lengths or add that last 2 feet as needed. Pins on each end slide into the 4 foot Banner Trak sections. Perfectly matches all Banner Trak for clean installations. Sold as each, buy as many as you need.
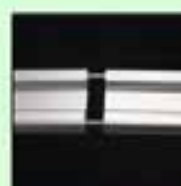

BT-1014
12" Hang Rods

Use these hang rods whenever you are doing a ceiling or drop down installation. Hang one banner on top of another and don't forget to look at the BT-1009 6" hang rods and the BT1008 T-Bar Ceiling Hooks for the most professional installation look with drop down ceiling installations. Sold as 1 package of 50 hooks.

SLK-3000 / SLKLAMP
LinKlip Chainlink fence mount w/bolt + LinKlamp Banner Plate

Use our SLKLAMP "Linklamp" and our SLK3000 "LinKlip" to hang banners perfectly straight on any size chain link fence. Sold as each, buy as many as you need. Just slide your track in place then tighten the SLK3000 bolt for a secure application. Sold as each, buy as many as you need but buy both part numbers together.

BTMAG
NEW

Use our Magnet Mount with BannerTrak for hanging banners on surfaces like Pallet racks, metal shelving or any metal surface. Our nickel plated 2" radius magnetic mount offers 49lbs of pull per magnet. BannerTrak comes predrilled and ready to use with this Magnet Mount. Removable and repositionable when needed.

Side /Wall Mounting Brackets

SIDE MOUNTING BRACKET, Cast Aluminum (SMS1 or SMS166)
The side mounting bracket can be mounted on any surface for supporting a pole in a vertical position. In some cases, a single bracket will perform well but two brackets are recommended. This system can be used for a horizontal hanging from under a ceiling or off the edge of a ledge. Frequently, they are used for attaching flagpoles to a fenceline. They strap easily to the upright support pole quickly with straps, SSC188 or SSC188BLK. The size of the bracket and flagpole is to be determined by the size of the banner and the geographic location.

Part# SMS1

Hurricane Adjustable Pole Banner Kits

This state-of-the-art system is designed to withstand the elements. Adjustable Fiberglass Pole Banner brackets come with a 10 year prorated warranty. The base is made from rust free cast aluminum with fiberglass arms. The fiberglass arms will flex in strong winds, transferring some of the wind load off the banner. The arm is also canted for added wind resistance.

Part#	Description
HS31	Hurricane Single Banner Adjustable Pole Kit; includes Two Brackets, Two adjustable canted arms with 31" exposed fiberglass rods and Four 9/16" screw gear bands. Fiberglass arms can be cut to desired size
PBPH31	Hurricane Single Banner Adjustable Pole Rod with canted arm (Slides into Hurricane base plate)
PBPHB	Hurricane Single Banner Adjustable Pole Base Plate

Single Kit

Part# HS31

Unique base design will fit square, round, or multi-sided poles. The bracket is designed to be adjustable for fitting and arms can be replaced without removing banding. To adjust your banner all you need is a standard allen wrench set.

Part#	Description
HD31	Hurricane Double Banner Adjustable Pole Kit; includes Four Brackets, Four adjustable canted arms with 31" exposed fiberglass rods and Four 9/16" screw gear bands. Fiberglass arms can be cut to desired size

PREMIUM SPRING POLE BANNER KITS - FIBER-GLASS

Fiber-Glass Pole System

The patented stainless steel spring arm design bends up to 60 degrees to deflect the strongest winds, helping banners last longer. Use this system exclusively when you are mounting banners to old wooden or steel poles as the spring arm also significantly reduces wind load on the pole.

SINGLE KIT

Kit includes:

2 - Spring Castings
1 - Premium Fiber-Glass Arm
1 - Spring Fiber-Glass Arm
4 - 40" Stainless Steel Bands
2 - Large Pins

8 - Screws
2 - Large Washers
8 - Small Washers

Part #	Description
BPSAD	Double Premium Spring Arm - 30"

*3/4" Poles - 2¹/²" Pole Pocket w/#2 Grommet Recommended

Easy Installation and change Out

No more installer complaints about changing out banners. Just bend the rod, slip off the banner and slip on the new one. It's made of all stainless steel and aluminum components and WILL NOT rust. The spring arm flexes in the wind, reducing wind stress, resulting in longer banner life and a faster banner change out, saving you up to 50% in labor costs.

- Stainless steel and aluminum - no corrosion, no rust, no equal.
- The stainless steel spring arm flexes up to 60° and snaps right back into place.
- A stainless steel sleeve protecting the rod from rubbing on the casting base
- Graphic change out with the spring arm is much easier and drastically cuts time
- Standard arm is 30" and can be cut to any length
- Mounts on both poles and walls for maximum versatility.

Banner Bungees

HANG YOUR BANNERS ON ANY POLE OR RAIL.

Help to protect your banner with these handy little ball ties.

These Banner Bungee Ball Ties are ideal for prolonging the life of your banner. The bungee cord takes the majority of the stress caused by the elements.
As this takes the pressure off of the banner's eyelets, it means that your banner is better protected and will last longer.

Our Banner Bungees will make hanging a banner easy! Each bungee cord measures 6", 8" or 10". With Banner Bungees you will never need to bother with tape, nails or even zip-ties. Banner Bungees make it easy to hang your personalized banner from any pole, fence or railing!

BANNER BOND 72 YDS
Banner Hemming Tape

Part#	Description	
BB1	1" x 72 yds	Banner BOND Hemming Tape
BB1C	1" x 72 yds	Banner BOND Hemming Tape **CASE OF 36 ROLLS**
BB150	1 1/2" x 72 yds	Banner BOND Hemming Tape
BB150C	1 1/2" x 72 yds	Banner BOND Hemming Tape **CASE OF 24 ROLLS**

BannerBond is designed specifically for hemming banners. Our BannerBond tape provides plasticizer resistance and easily tears with your bare hands for quick and easy banner hemming production.
These rolls are extra long 72-yard rolls.

Made In the U.S.A.

▶ **Instant banner hems**
▶ **General purpose bonding, fixing, mounting and splicing of fabrics**
▶ **Mounting of nameplates, trophies, textiles and signs**

Part# BB1   Part# BB150

MEGA BOND

Ultra High Bond Double Sided Mounting Tapes

Made In the U.S.A.

UHB-Ultra High Bond Double Coated Tapes are thick structural grade tapes that give you the speed, convenience and simplicity of a tape fastener. Ideal for use in many interior and exterior structural bonding applications. They can replace rivets, spot welds, liquid adhesives and other permanent fasteners. Always test before using or call for recommendation. 36-yard rolls.

MEGABOND BLACK

tapes provide a superior, permanent bond between a wide variety of substrates, including glass, most plastics, composites, sealed wood, metals and painted metals. They withstand a wide range of weathering and temperature conditions without losing adhesion.

Part# MB1BLK

MEGABOND CLEAR

bonds to most surfaces and is recommended when bonding low energy surface material such as PVC, ABS, Polyethylene (PE) and Polypropylene (PP). Not recommended for bonding Teflon ™, Tedlar, silicone or EPDM.

Part# MB1CLR

MEGABOND GREY

is used primarily in the transportation industry, automotive, truck, trailer and bus, signs, graphic art assemblies, furniture/appliance manufacturing and non-rivet RV skin to frame assembly. Rugged metal to metal bonds to replace welding, rivets, bolts, screw and cementing. It will maintain adhesion at sub-zero temperatures and is non-staining and will not harden or become brittle with age. It isolates and dampens vibration and shock.
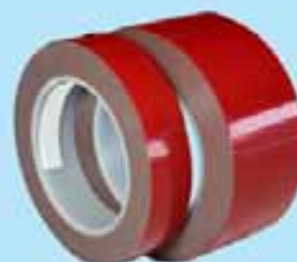

Part# MB1GRY

Part#	Description
MB1BLK	1" x 36 yards, Black UHB Mounting foam tape with green release liner (comparable to Tesa 51930), 30 mil thickness
MB1CLR	1" x 36 yards, Clear UHB Mounting Tape with Red PE release liner (comparable to 3M 4905, 20 mil thickness
MB1GRY	1" x 36 yards, Gray UHB Mounting Tape with red PE release liner (comparable to 3M 4945), 45 mil thickness

DOUBLE COATED CONCRETE TAPE

CMT is made specifically for cement, concrete walls, cinder block and other mild or semi-porous surfaces (not for stucco). Secure over a clean surface. This eliminates the need to drill and tap screws into your concrete/cement surfaces for the purpose of securing your signage and finishing your mounting needs. Conforms well on porous surfaces to create a permanent bond with a flush appearance.

CMT is great for indoor and outdoor applications. This tape will not adhere to a dirty or dusty surface. Always test before using. 66' rolls.

Made In the U.S.A.

Part#	Description
CMT1	1" Concrete Mounting Tape, 66-foot rolls
CMT1B	Case Quantity-1" Concrete Mounting Tape, 66-foot rolls, 16-rolls per case

Part# CMT1

DOUBLE COATED SOOPER STICKY RED TAPE

SSR1 Sooper Sticky Red is actually a clear high performance, double sided tape designed for hard to stick applications. It has strong plasticizer resistance, tolerates high temperature applications, and sticks well to UV coatings. Our Sooper Sticky Red tape's clarity keeps graphics sharp and readable – no yellow or foggy appearance during or after application and mounting. Excellent resistance to Solvent, chemical, aging and heat. Highly recommended for LSE Substrates.

If you need a "death-grip" hold on your signs or banner hems, this tape will do the job! Always test before using. 60-yard rolls.

▶ Mounting nameplates, plastic trim, signs and emblems
▶ Long term bonding of plastic hangers, mirror mounting, etc.
▶ Permanent fixing for metal or plastic in indoor applications only

Part#	Description
SSR1	1"Sooper Sticky Red Bonding Tape, 60-yard rolls

Made In the U.S.A.

Part# SSR1

STEEL TAPE FOR MAGNETS

Can be attached to most smooth surfaces, allowing for magnetic attraction. Designed to make interchangeable signage without permanent fasteners. Use with our XM6/XMH6 Installer Magz to apply graphics to plastic/fiber glass/aluminum body parts and onto glass.
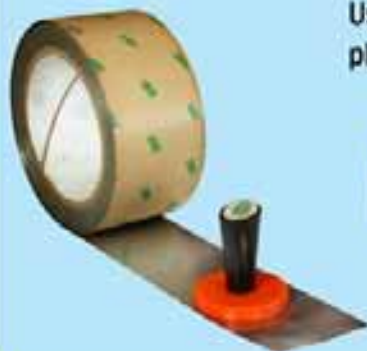

Part#	Description
ST2X100	2" x 100' Steel tape with adhesive

Made In the U.S.A.

Part# ST2X100

HOOK & LOOP FASTENERS

HOOK & LOOP are ideal for connecting and disconnecting two substrates without any mechanical fasteners. Hook is ideal for mounting plaques, signs, banners, picture frame moulding when a strong reusable fastener is required onto a fabric wall, etc.

Part# HOOK1

Part#	Description
HOOK1	1" x 25 yards, white hook with adhesive
LOOP1	1" x 25 yards, white loop with adhesive

Made In the U.S.A.

Part# LOOP1

- Over 10,000 pulls
- 9 mil hook
- More hooks per square inch
- Exceeds military specifications
- Extremely high manufacturing quality control

SOOPER STRONG HOOK AND LOOP

Part# SSHOOK

WHEN YOU NEED SOMETHING STRONGER

This specialty fastener is for applications that require a strong, durable hold and grip. The most aggressive high-cycle closure product in the fastener tapes market. This Hook and Loop product offers an astonishing 1 square inch per pound rating. Outperforms any other type or brand of hook and loop or locking tape technology in the market. Ideal for your removable/repositionable /replaceable mounting needs including pictures, posters, signs and substrates.

Part# SSLOOP

Product Details:

- Superior Holding power-1 square inch per pound.
- Sooper strong adhesive on back holds better and lasts longer.
- Sooper strong Hook and Loop holds more weight than regular hook and loop or locking technology tapes.
- Great for long-term mounting of signs, pictures, posters, remote devices, computer accessories, panels, automotive interiors, aircraft, tonneau covers, truck bed liners, travel trailers and more.
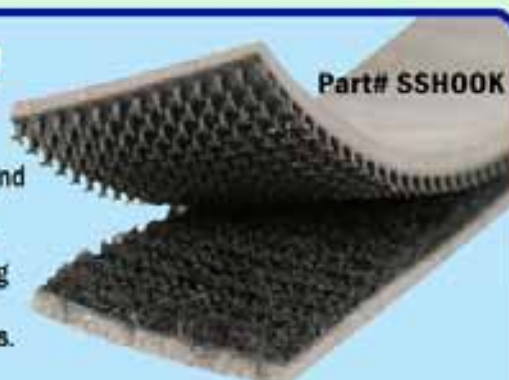

MegaEdge Single-Sided Banner Tape

MegaEdge is a white, SINGLE-SIDED sooper strong and slightly rigid acrylic polyester Banner Edge tape designed for unhemmed banner edge, grommet reinforcement and edge curl reduction. High tack acrylic-based adhesive. MegaEdge is used to reinforce banner and sign edges; splicing of plastic film, paper, and foil; ideal for promotional displays.

Use indoors and outdoors when you don't want to sew or fold-hem a banner's edges.

Works double duty with a grommet for extra strength and anti-tear resistance.

9.5 mil thick. 1.5" wide by 36 yards (108 feet) roll.

Part# MEDGE

Hobby & Craft Scrapbooking Tape

Scrapbooking Tapes are perfect for mounting, mending, and repairing photographs, documents, and other memorabilia. The adhesive formulas are PH Neutral and double-sided tape with permanent adhesive offering easy hand tearing and cleaner unwinding. Excellent adhesion to paper, most plastic films, metal foils, etc. Ultra-violet light has little or no effect on adhesive.

APPLICATIONS: Used for crafting, mounting nameplates, picture framing, product assembly, design and packaging of prototypes, sealing envelopes, paper web splicing, and general mounting and holding.
Available in ¼" and ½" widths by 36 yards.

Part# SBT14

Part#	Description
SBT14	¼" (6mm) wide X 36 yard Scrapbook Tape
SBT12	½" (12mm) wide X 36 yard Scrapbook Tape
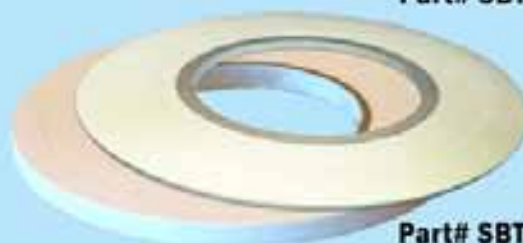

Part# SBT12

General Purpose Masking Tape

The crepe paper backing tears easily and conforms to curved and irregular surfaces and around corners for sign making, layout and vehicle wrap use. The natural rubber adhesive bonds well to metal, drywall, wood, and painted surfaces and offers clean removal. Our General Purpose Masking Tape has good adhesion, holding power, and provides good paint lines and performs well for general purpose masking projects where surfaces are not easily damaged. The tape provides instant adhesion to a wide variety of surfaces with high holding power that resists lifting and curling.

Part#	Description
GPMT1	1" X 36 yards General Purpose Masking Tape
GPMT2	2" X 36 yards General Purpose Masking Tape

Part# GPMT1   **Part# GPMT2**

DOUBLE COATED SCREEN PRINT PALLET TAPE

Fast Pallet - ImageOne Impact's Fast Pallet is a removable and reusable, double-sided, Screen Print Pallet tape for use on print surfaces of textile screen print, DTG and CNC Router equipment.
Stop spraying your pallets to keep your textiles in place. This is a double-coated, bleached flat-back, paper tape with a high shear resistance and hot-melt adhesive that bonds well to almost any surface. Extends pallet life, eliminates need for cleaning solvents and reduces downtime for pallet clean-up. Always test before using. 20' rolls. If you're using pallet tape on your press, simply clean lint off the tape after a job with clean water and your tape is ready to print again. Yes, it's that easy. It's so easy in fact over 90% of large screen shops use it.

- ▶ **Applies to pallet quickly**
- ▶ **Unrolls quickly with little effort**
- ▶ **Peels off quickly and easily with little to no shredding**
- ▶ **Can be used with flash cure units-No Flash Shift!**
- ▶ **Lasts 50% longer on average – print 600-1000 textiles before cleaning the tape**

Part# SPPT1420

Made In the U.S.A.

Part#	Description
SPPT1420	14" X 20" Double Coated Pallet Tape
SPPT1420C	Case Quantity-14" X 20' Double Coated Pallet Tape, 16-rolls per case

SUBLIMATION TAPE

CHT-Clear Heat tape is a single coated, silicone adhesive that holds transfer in place during the sublimation process. Withstands temperatures short term up to 375 degrees and the tape removes cleanly from substrate without adhesive residue.

Part# CHT572

BANNER UPS®

POWERTAPE
HEM REINFORCING TAPE

Made In the U.S.A.

PowerTape Part#PTAPE
Reinforce banner edges without folding or sewing a hem

- Single-sided super-strong tape. No need to sew or fold hem!
- Create super-strong banners of any length in a few minutes!
- Less "roll wrinkle" and reduced edge curl.
- Much easier, faster, and stronger than regular double sided tape.

PowerTape Tips:
- Recommended for outdoor banners of 6 feet or more in length.
- Apply light tension to banner for easy application
- PowerTape may be used along sides of vertical banners to reduce edge curl

Apply Banner Ups PowerTabs®

Apply PowerTape® along top and bottom edge on back of banner

Punch hole

BANNER UPS®

MEGATAPE
HEM REINFORCING TAPE

MEGATAPE Part# MEGATAPE

- Produces a fold-finished banner edge for customers who prefer that look
- Withstood winds of 98+MPH in wind tunnel test!

MEGATAPE® TIPS:
- Recommended for use where ultimate strength is needed
- Use where folded edge is desired
- Combine with PowerTabs, or grommets, or both

Made In the U.S.A.

Apply MegaTape® along top and bottom edge

Fold edge, remove liner and press edge

Apply PowerTabs® and punch center hole

BANNER UPS®

POLETAPE

- This super strong adhesive goes on like tape but sticks like hot melt glue.
- Use PoleTape instead of sewing to create dowel pockets for pole banners or joining banner media.
- It may also be used for permanent mounting on wood, rigid plastics, and metal.
- Comes in 200ft value roll. Available in 1"x35mil and 1/2"x20mil.
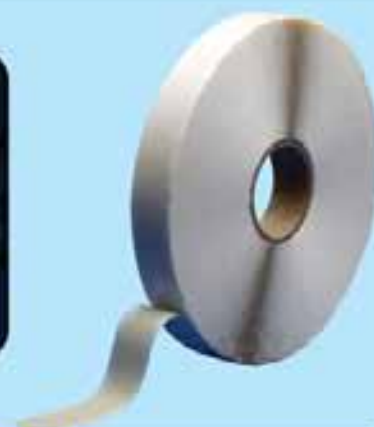

Part#	Description
POLE0520	PoleTape 20 mil 1/2" x 200 ft Roll
POLE135	PoleTape 35 mil 1" x 200 ft Roll

Bravo Aire T-Series Grommet Press

BravoAire Thumb Button Pneumatic Grommet Press

Our "BravoAir T" Series is the ultimate in safety for any pneumatic grommet attaching machine. For professional and higher volume shops looking to cut production times and make grommet setting easy. Place grommets in your banners and thin substrates faster, safer and easier than ever before. Fully pneumatic--no electricity required. Runs on your supplied air pressure. #2 Metal Die available. Clear grommet die included. Thumb button to activate grommet pressing. Heavy Duty durable machine. This model can be used with optional rolling platform to take your BravoAire T where you need your grommets placed. **(Air compressor not included.)**

Part# BRAVOT

Thumb PRESS

- Adjustable pneumatic pressure level.
- Completely assembled
- Advanced Safety system
- Interchangeable dies
- Suitable for applications on various materials

Rolling Platform for Bravo Aire

Need portability with your BravoAire pneumatic grommet press? Attach it to our rolling "Mobile Platform" and take your BravoAire to where you need your grommets placed. Excellent for large banner projects where multiple grommets are needed throughout the length of your banner edges. Strong, durable wheels that easily roll across your finishing tables or other hard surfaces, yet lock into place when you need your press to be stationary.

Part# MPLAT

BRAVO Aire F-Series
Grommet Press

Fully Pneumatic Press

BravoAire Foot Pedal Pneumatic Grommet Press

Our "BravoAire F" Series Foot Pedal activated pneumatic grommet press offers the addition of a foot press for hands-free operation. Same great ultimate safety features compared to other pneumatic presses. Fully pneumatic- -no electricity required. Runs on your supplied air pressure. #2 Metal Die available. Clear grommet die included. Foot Pedal to activate grommet pressing. Heavy Duty durable machine. **(Air compressor not included.)**

- Hands-free use
- Adjustable pneumatic pressure level.
- Completely assembled
- Advanced Safety system
- Interchangeable dies

Metal Grommets

"There is hardly anything in the world that someone cannot make a little worse and sell a little cheaper, and the people who consider price alone are that person's lawful prey.

Grommet Press

ECONO Air

No electricity needed. This economically priced pneumatic grommet press works with your air compressor making it easy to use and easy to take out on job sites, move all around your shop or even mount in your installer's truck. Our Econo-Air is a powerful compact press capable of punching a hole in a wide range of sign materials including multiple layers of banner media (going through folded banner and reinforcement webbing at one time) placing a grommet with washer in a single step. It's as easy to use as stepping on the included foot pedal. Operates at 145psi. Part# ECONO

Includes: air regulator, air filter, #2 die for metal grommets. (Air compressor and grommets not included.)

• Hands-free foot pedal activation
• Adjustable pneumatic pressure level
• Completely assembled. Comes as shown in the photo.
• Suitable for applications on various materials. Vinyl, banner, corrugated plastic, other plastics, fabrics, poster board and more.
• Interchangeable dies. Comes with #2 metal die. All other sizes available for additional cost.
• Economical and easy to use!

Sooper Edge
The ULTIMATE Safety Ruler

BEST IN THE INDUSTRY!

2 5/8"

Made In the U.S.A.

All New Design!

The Sooper Edge is the premier safety ruler in the sign and graphics industry

More Features & Benefits than any other Safety Ruler!

- Made of heavy duty aluminum construction
- No unfinished edges gives you no black marks on your graphics or fingers
- Polished and anodized so they don't leave fingerprints
- Purple finish is permanent, doesn't chip off and is easy to find in any shop
- Non-slip grip on the bottom keeps the knife steady and firmly in place
- Excellent curved finger guard for maximum protection from knife mis-use or slips
- Laser etched graphics and measurements for permanent lifelong use
- Inserted stainless steel edge to eliminate cutting into the ruler
  - Gives maximum performance and lifetime use.
- Channel on back to hold cutting head so all sizes make perfectly straight cuts the entire length

Optional Cutting Head
Part# WC6001

<u>Optional cutting head attachment</u> cuts up to ½" thick soft materials. Use foamboard under material to be cut as an underlay (not directly on cutting mat). Cutting mats and hard surface table tops are too dense for the blade to cut into and puts far more stress on the tool than what it was designed for. Cuts paper, vinyl, banner, and soft center foamboards.
- Maximum cutting effort with minimal effort--simple press and pull operation
- Perfectly straight cuts the entire length of each size

OLFA®

Designer's Layout Rulers

OLFA ruler makes any project easier, whether you're working with fabrics, paper or other materials. Good for precise measurements and cutting angles for sewing and quilting, design, pre-cutting substrates, sign layouts, hobby and craft booking.

DETAILS:
- Frosted acrylic surface allows black imprinted numbers to be read effortlessly
- Frosted surface is non-slip for extra stability and safety when cutting
- Designed for accuracy and precision with grid lines marked in 1/8", 1/4", 1/2" and 1" increments
- Features a compass with pivot-point angles for 15 -, 30 -, 45 -, 60 - and 90-degree cuts

Weeding PEN

Our Weeding pen is a larger sized "ball point pen" style tool with a larger round pin point. This tool retracts and protracts just like a "ball point pen" as well. The larger handle makes it a great tool to weed vinyl before application. No more fumbling with pins or lost art knives. Keep this on you or in your tool pouch at all times and weed away when the jobs come in. Every employee should have this tool! Can also be used to pop bubbles (never use a knife).

Easy replacement tips available

Shop Table
Frame Assembly

Part# TBLF
(Shown with 5'x10'
Table Top NOT Included)

Part # TBLF
4'x8' Table Frame
Wheels Included

Part# TBLF
shown with Part# TBLEX4
4'x8' Frame w/extension
Holds up to 6'x12' Top

Part# TBLF2448
2'x4' Table Frame
Table Top NOT Included

This "ROCK SOLID" shop table frame assembly is designed for heavy duty, heavy use sign and graphics shop work. Using an aluminum extrusion designed for strength and precision fit, this table frame can handle all the sign and graphics work you will put on it! This kit is an easy bolt-together frame system so it can easily be assembled and disassembled to accommodate any doorway or hallway constraints. The six (6) locking wheels included with this kit make it easy to move and easy to lock into a stationary position as needed with day to day large and small jobs. Set at the perfect finished ergonomic height of 34" tall, this frame is perfect for the following sized table tops: 4X8, 4X10, 5X8, and 5X10.

Need a longer table, be sure to order the add-on table extender (Part # TBLEX4) to make 12' long tables with ease. We also recommend you visit page 55 to view cutting mats for the top of your new table.

This kit features:
- Perfect finished height of 34" inches
- Instructions with assembly photos included
- Super Strong precision fit Aluminum Extrusions
- Six (6) locking wheels for easy portability or stationary positioning
- Only requires a hex key wrench and socket wrench to set-up.
- Add your own desired top from a cabinet shop or hardware store
- Permanent shop table for years and years of use

GYRO-CUT ®
Craft and Hobby Tool

The amazing GYRO-CUT® craft and hobby tool is designed to easily cut thin sheet materials such as paper, thin card up to 240gsm, vinyls, thin mylar sheet, masking material, decoupatch, etc. This hand-held tool has a 360 degree rotating blade which enables you to cut very complex shapes easily and quickly.
The ergonomically designed handle is comfortable for both right-and left-handed use. Unlike other craft knives, the GYRO-CUT® blade will not readily cut human skin in normal use, making it a much safer alternative to scalpels and scissors.
Applications include paper-cutting, decoupage, stencil-making, paper- crafting, scrapbooking, card-making and many other uses. The special blade technology allows you to cut straight lines using a plastic ruler and curved lines using a French curve or other types of templates. GYRO-CUT® is also perfect for cutting freestyle shapes; it allows you to be as creative as you like while cutting paper and other materials.
Replacement blades are available in packs of two.

Alumalite® Squeegees

Don't be fooled by cheap imitations - our "Alumalite® Squeegees" are used by professional shops and installers. Made of lightweight aluminum for easy use, solid construction and years of use. These squeegees are perfect for large applications and make fast work during large format installs on windows, vehicles, banners and most any large sign surface. We have a variety of sizes and options and discounted package pricing, so whether you're starting a signage company or simply looking for tools for a project, our signage squeegees are the solution.

Made In the U.S.A.

The "sooper-glide" felt edges make for a smooth application with no harm to the sign or substrate. Be sure to watch our videos online to see how fast and easy these tools are.

Part#	Description
Part #: SQAL08	8 inch squeegee is perfect for delicate, custom jobs.
Part #: SQAL14	14 inch squeegee is perfect for vehicles and most other vinyl jobs.
Part #: SQAL20	20 inch squeegee works for almost any application. One of our most popular sizes.
Part #: SQAL26	26 inch squeegee works for almost any application. One of our most popular sizes.
Part #: SQAL38	38 inch squeegee is typically used by specialty signage companies and wide-format printers.
Part #: SQAL50	50 inch squeegee will make even the most daunting signage project seem like a breeze.

VALUE 5-PAK

- 26" Squeegee
- 38" Squeegee
- 50" Squeegee

Alumalite® Threaded Handle

Made In the U.S.A.

The Alumalite Threaded replacement handle is for customers wanting to add on an extender/telescopic long-reach handle to their favorite Alumalite Squeegee. This single replacement handle has a threaded female end that will receive most standard sized threaded pole type and telescopic extender handles sold at most hardware stores. This allows the Alumalite squeegee to be used like a broom for floor graphics and for installing larger wall and window graphics above the installer's normal reach. Comes with Allen Screw and Allen Key to tighten and replace original Alumalite handles.

Part# ALTH

Shown with extender pole
(handle not included)

Roller Squeegee Brayers

Part# RLSQ12

Part# RLSQ6

Part# RLSQ3

Part #: RLSQ3
Our 3" narrow Roller Squeegee/Brayer is the perfect size for applying banner hem tapes and double-sided tapes onto your substrates and surfaces. Great for rolling out vinyl or tapes when extra pressure may be needed. The comfortable handle gives you ease of use and a strong grip so you can apply the necessary pressure while rolling over your tapes. Can also be used for ink pads and scrapbooking tasks.

Part# RLSQ6
Our 6" medium-wide Roller Squeegee/Brayer is the perfect size for use with small graphic applications and for use on vehicle wraps where you can't risk dragging a plastic squeegee across the graphic or media. Great for rolling out vinyl when extra pressure may be needed. The comfortable handle gives you ease of use and a strong grip so you can apply the necessary pressure while rolling over your tapes. Great for applying vinyl film to fluted Coroplast blanks. Can also be used to create your very own textured roller stamps and transfer stamped designs to paper and fabric.

Part #: RLSQ12
Our 12" wide Roller Squeegee/Brayer can tackle your large applications indoors or out. Wall Graphics, trailer graphics and big rig jobs are much faster and easier when you add our 12" wide roller squeegee/brayer. Great for rolling out vinyl when extra pressure may be needed. Works great with your smaller hand lamination jobs using PSV laminates. This is a great application tool that every shop should have on hand. Works with wet or dry applications. During wet transfer, it squeezes out excess liquid with minimum abrasion onto the film surface. Great for applying vinyl film to fluted Coroplast blanks.

The Ultimate Laminator Toolkit

Each laminator must have one of these kits. Finally a complete kit for eliminating static electricity and build up, plus the necessary GraphicsGloves™ Media handling gloves for loading and unloading your print media to a printer or printed media onto a laminator to eliminate skin oils and hand prints in the image or finished print. This kit also includes an Econo Liner Cutting Tool so you can cut your media off the laminator without scratching the platen. This tool kit includes a comprehensive general purpose guide to properly using and troubleshooting issues in the lamination process. Includes how to resolve silvering, improper tensions, pressure and heat assist processes.

This book makes your employees instant pros.

Part# LAMKIT

Contents:
- 12 Page booklet with essential laminating advice.
- 1 Pair of Graphic Gloves
- 1 Set of Static Elastic Wire with magnet mounts
- 1 Economy Liner Cutter

Graphics Glove

BEST IN THE INDUSTRY!

Used by true professional graphics people. These premium media handling gloves are worn when loading, handling and working with digital media, overlaminates, printable substrates, negatives and transparencies. The GraphicsGlove™ help to prevent the transfer of oils, perspiration and smudges to the media and films your hands come in contact with. The GraphicsGlove™ is made of a proprietary blend of materials, that is highly recommended for non-static applications, making them ideal for the graphics industry. The Slip-on Style, Tight Fit, allows for an ultra-sensitive feel, unmatched in the industry. "One size fits most"

Used daily by professionals in the graphics industry, the GraphicsGlove™ will ensure your expensive print medias are protected from oil and sweat transfer from your hands, offer excellent glide when used during hand-cutting in the shop or in the field. And, this is why treating print media, substrates and even prints and photos with care upfront should always be a priority in your shop.

Features:
- Prevent getting fingerprints and smudges on the print, substrate, media or film
- Ensure your expensive print medias are protected from oil and sweat transfer from your hands
- Offer excellent glide when used during hand-cutting in the shop or in the field
- Slip-on Style, one size fits most

Part# GGLOVE
(2 pair per pack)

Recommended by

NESCHEN SEAL
Media Manufacture

Disposable Media Handling Gloves

These Lightweight Cotton Gloves are worn when handling digital media, substrates negatives and transparencies to prevent getting fingerprints and smudges on the print, substrate, media or film. 100% Cotton; Slip-on Style; No Ornamental stitching.

Typically, it's without much thought, we pick up a roll of media, a substrate, print or photo with our bare hands. After loading the media or substrate into the printer or showing off our memories, we put it back into their envelope or box and/or up on its shelf or media rack. As the media, substrate, print or photo sits there, the oils and sweat from our hands that were left behind eventually cause the print or photo surface to break down or change its surface tension making your next print a failure with noticeable fingerprints.

AVERY DENNISON

NEW

WetEdge Magnet Squeegee
Part# SQMAGWES

Wrap your vehicles faster and better. The only squeegee applicator made to use wet. No scratches, no marks, just smooth motions that easily glides across vinyl films and painted surfaces without worry of mistakes or damage. The WetEdge Squeegee is a Teflon squeegee with a unique microfiber edge bonded to it. Can be used either wet or dry. This is the top of the line applicator in the business!

The magic of ImageOne Impact's WetEdge begins with ultra-microfibers so fine they cannot be seen by the human eye, ultra-microfibers so microscopically minute a single pound of them could be stretched from the earth to the moon—and back. Transforming ultra-microfibers this fine into a practical fabric demands a complex, multi-patented process, and continues today with equally innovative R&D activities conducted at ImageOne Impact with our unique WetEdge Squeegee applicator tool.

The Benefits of a "WetEdge" Squeegee:
- True Professionals use the Wet Edge!
- Teflon edge glides and cuts across media easier than the standard squeegee.
- By applying water to the Wet Edge side, it allows squeegee to glide over media without scratching laminate. It also reduces friction.
- Wet Edge material goes all the way to edge of squeegee to allow installation in tight areas. We use this almost like a paint brush.
- Helps when laying die cut or cut vinyl to vehicles without scratching painted surfaces.

WES	WetEdge Squeegee
SQMAGWES	WetEdge Magnet Squeegee

SE360™

WRAP | TINTING | RESTYLING TOOL

The most ergonomically correct squeegee in the world!
The Squeegee Evolved 360 , with our ergonomic design and functionality allows users to not only grip with less strain to the hand itself but gripped in any position during a typical installation of graphic films and maintain the same level of ergonomic support to the human hand, practically eliminating muscle fatigue and damage to the Median Nerve. The Soft Rubber handle removes pressure to the wrist and provides a cushion or buffer for a better overall grip of the tool itself. The thumb recess area puts the thumb into a Braced Position much like a splint providing better control, better posture with less strain to the thumb joint, muscles and tendons. Kit comes complete as shown with One handle and 3 Quick Change Blades.

3-pack blade set - Total of Five Wrap Blades, All Hard Rubber Edged Blades Covered With Micro Suede Thermally Bonded For long Lasting Use, Anti-Scuff and Designed Specifically For Challenging Vehicle Curves

Restylers Kit	Wrap Kit	Window Tint Kit
1 Complete Handle with 1 (one) Standard Blade + 2 Kit Blades	1 Complete Handle with 1 (one) Standard Blade + 2 Kit Blades	1 Complete Handle with 1 (one) Standard Blade + 2 Kit Blades
Part #: SE360R	**Part #: SE360W**	**Part #: SE360T**

 Part #: SEBP3S	**3 Blade Pack-Green (HARD)** rigid blades for everyday uses in vinyl application. Low flexibility designed to maximize downforce pressure on any surface, but not to be used on vinyl without transfer tape.
 Part #: SEBP3R	**3 Blade Pack-Midnight (SOFT)** semi-rigid blades with thermally bonded micro-fibers for curved surfaces where blade flexibility is needed. Gives maximum pressure without drag. No scuffing, safe for high-gloss and matte films.
 Part #: SEBP3W	**3 Blade Pack-Charcoal (MEDIUM)** rigid blades with thermally bonded micro-fibers for most flat surfaces where less blade flex is needed. For mild curves. No scuffing, safe for high-gloss and matte films.
 Part #: SEBP3TB	**3 Blade Pack-Blue (HARD)** rigid blades for everyday use in all flat window tint applications. Very low flexibility for maximum down-force pressure on all tint films while providing a more consistent and durable edge.
 Part #: SEBP3TG	**3 Blade Pack-Gold (MEDIUM)** stiffness semi-rigid blades offering more flexibility for curved vehicle windows. Gives smooth consistent pressure without drag, consistent edge fidelity, more control, low friction blade, safe for all tint films.

MAGNET SQUEEGEE
The double-duty squeegee and magnet in one.

The installer's choice.
- It's a magnet that will hold your knife
- It's a squeegee that holds your graphics on the car while you work
- Keeps your tools in front of you instead of on the ground or in your pocket
- Eliminates the need for tape
- Excellent for vinyl, laminate, PPF film, labels, decals, vehicle wraps and more.

Part# SQMAG

(Does not include knife)

SQUEEGEE BRAYER COMBO TOOL

An ideal multi-purpose applicator for films, laminates and PSV applications. Standard 4-5/8" wide application squeegee that includes a built in roller brayer on one side and a unique swept angle for smooth, bubble free laydown of PSV films to flat surfaces. Features unique wedge shaped edges to help protect from marring the film, laminate or substrate.

Part# SQBRYR

FELT BLOCKS

Part# FBLOCK

Specifically designed tool for application of vinyl materials. Soft felt block shaped squeegee is designed to avoid scratching of the vinyl. Great applicator for use with digital print mounting as well as the perfect install tool for glass. Belongs in the shop as well as every installer's tool kit!

4" & 6" PLASTIC WITH FELT SQUEEGEE

6" Felt

Part# SQFLT6

This easy-to-use, squeegee features a felt edge on one side for easy glide and a soft side and hard side on one tool. It is the ideal tool that makes any vinyl installation fast and easy! Helps eliminate scratches.
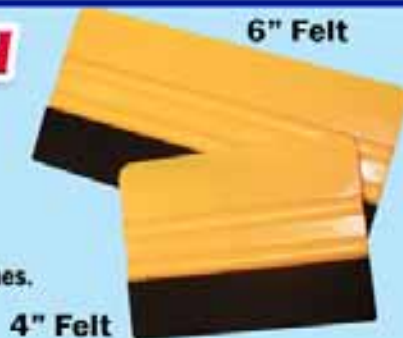

4" Felt

Part# SQFLT4

TEFLON SQUEEGEE

6" Teflon

Part# SQTEF6

A stiffer Teflon application squeegee designed for the installation of vinyl decals & graphics. The Teflon Squeegee gives an easy glide on vinyl, application tape and paint surfaces and won't allow many adhesives to stick to it. Twin ribs for easy handling and pressure control. Strong memory, medium flex and high glide. Ideal for vinyl, film, decals, graphics, tape, silk screen and pressure-sensitive applications.

4" Teflon

Part# SQTEF4

77

SILVER NYLON SQUEEGEE

Our Silver Nylon squeegees outlast other squeegees. Nylon reinforced to keep its edge and last longer than ordinary plastic squeegees. Useful for either window film, paint protection film, decals, wrap films and more.

Part# SQNYLN4

GOLD NYLON BLEND SQUEEGEE

Gold squeegees are known to be the most durable since they are made from a more expensive grade of plastic known as nylon or nylon blend. Our squeegees offer 3 rounded corners and one 90 degree sharp corner to help you with any shape or application challenge. This 4" squeegee also offers a softer side and a harder side so it is perfect for any application needs you have.

Part# SQ4G

SOFT FLEX SQUEEGEE

This is our thinnest and softest squeegee we offer. Made of a unique rubber/plastic blend giving this squeegee excellent bend and flex which is perfect for vehicle applications and curved surfaces.

Part# SQSOFT4

12" SQUEEGEE

Our 12" wide squeegee makes fast work for large graphic applications. A great low cost, wide and fast applicator applies large graphics in big wide strokes!

Part# SQ12

6" SQUEEGEE

The best low cost 6" squeegee applicator in the business. Made of long-lasting polyurethane with ribbed profile and radial corners, our 6" squeegee features both inches and metric quick measurements on the edges of one side.

Part# SQ6S

78

MORE INFO: 1-800-818-0222 • FAX 949-709-7790 • www.image1impact.com
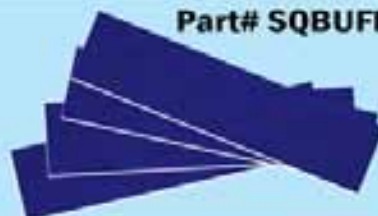

Recommended by Justin Pate, these pre-cut better than felt buffers fit standard 4" squeegee and they do not scratch. Self-adhesive squeegee buffer for use on flat surfaces. Give your hard plastic squeegees a soft side!

Part# SQBUFF4

SQUEEGEE SLEEVES

Our Squeegee Sleeves for 4" and 6" squeegees allow you to apply your vinyl letters and graphics to your substrates with reduced scratches and low friction for faster work. Just slip over your squeegee before application. Keeps you from damaging your work when using your squeegee. Come in 5-paks (squeegee is not included)

6" Sleeve

Part# SQSLEV6

Part# SQSLEV4

4" Sleeve

4" TRANSPARENT SQUEEGEE

Our Translucent Sooper Stiff Squeegee is the most stiff squeegee we offer. When you need to apply a lot of pressure to apply your graphics, this is the squeegee for you!

Part# SQSTIF4

STANDARD ORANGE SQUEEGEE

The best low cost Standard 4" squeegee in the business. Our squeegees offer 3 rounded corners and one 90 degree sharp corner to help you with any shape or application challenge. This squeegee is best suited for those who prefer a good stiff hard squeegee. Great for applying on to solid flat substrate and flat rigid surfaces.

Part# SQ4S

12" RUBBER BLADE SQUEEGEE

Our 12" Rubber Blade Squeegee is a center handle wide blade squeegee for quick film application, window tinting and window cleaning. The best squeegee for removing water from surfaces and windows.

Part# SQRB12

TEFLON SQUEEGEE TAPE

Teflon Squeegee Tape is an awesome way to make any squeegee glide over your vinyl film when used during the application and installation process where a smooth slide is needed for a faster install.
Just cut the tape and wrap it around an end of the squeegee!
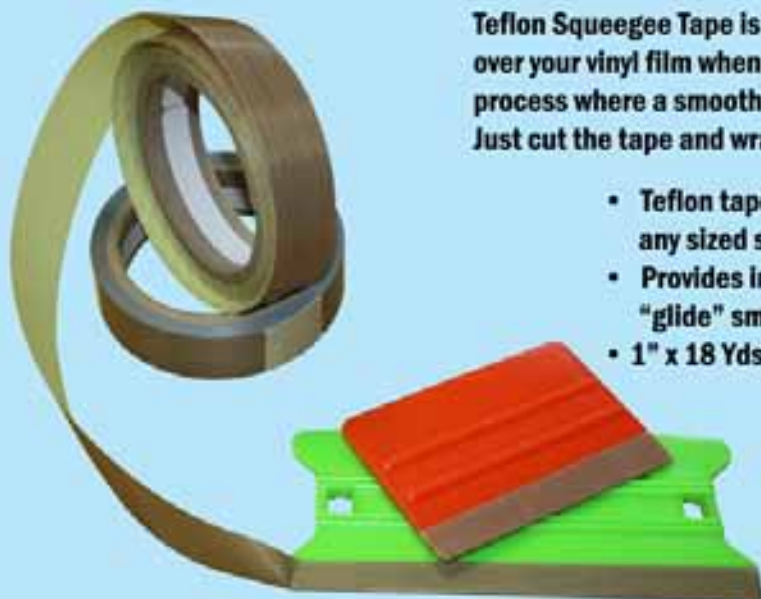

- Teflon tape that can be applied to the edges of most any sized squeegee
- Provides increased speed and makes the squeegee "glide" smoothly over most film and print media surfaces
- 1" x 18 Yds Roll

Part# SQCNTUR

Squeegee Sharpener

Maximize the Life of Your Application Squeegee / Hard Card Window Film Squeegee! An ideal way to maintain a sharp edge on hard cards and other squeegees is to use our Squeegee Sharpener. With one or two strokes your squeegee edge is restored to the same condition as when you first bought it. Tool Tip: When installing window film or drying your squeegee off you can create microscopic nicks and scratches on your hard cards and window film squeegees. After several vinyl applications or vehicle wraps your application squeegees can get deformed or arched in the centers rendering them useless. Use the Squeegee Sharpener to remove these invisible nicks and maximize the amount of film mounting or liquid solution you remove with each stroke. The Squeegee Sharpener also helps lower the chances of possibly scratching pressure sensitive vinyl film and window film.

Made In
the U.S.A.

Part# SQSHARP

Dura Chizel

The Dura Chizel - Its uses are limitless. It's ideal for scraping away old film, scraping leftover adhesives off, taking something off a sensitive surface, removing decals, pressing down small film creases, and so much more.
Appx: 2.9"x2.3"

Part# DURACHZL

Lil' Chizler's

The Lil' Chizler's unique design enables it to remove stickers and vinyl letters easily. Make sure area is free of dust & debris and it will not scratch... even plexi-glass and clear coat paints. Great for small installs of Vinyl Graphics or removing old vinyl decals. Approximately 2.25"x3". Effectively scrapes any surface you don't want to mar or scratch. It is light, small, inexpensive and almost indestructible.

Part# LILCHZL

The G-N-G

The G-N-G is a sturdy 3-piece constructed product that has interchangeable blades. The blades conveniently snap in and out of the ridged body that is covered with a firm ergonomic handgrip. This ultra-comfortable G-N-G handgrip has an ergonomic shape and a deep surface texture that makes the G-N-G easy to use in wet or dry environments. Experience the next level of application squeegee performance when you try the all-new Grip-N-Glide today.

The Yellow Grip-N-Glide is designed for window film installations, and the Orange Grip-N-Glide is designed for paint protection film, vinyl graphics and car wrap films.

Nobody Offers More Squeegees For More Applications!

EZ Reach Ultra

With EZ Reach Ultra, there's no need for you to cut down a Teflon hard card to get the tool you want. EZ Reach Ultra fits the bill. Designed specifically to get at the corners of quarter glass windows, you'll also reach for it again and again to put down those little corners of film in hard to access areas.

Part# SQEZR

Green Glider Squeegee

The Green Glider Squeegee is the latest complement to our line-up of pro-quality squeegees. Its frame is durable, firm and fits comfortably in an installer's hand. Green Glider squeegees feature a contoured blade and unique protruding tips that make easy work of difficult corners and hard to reach body channels. Custom engineered to glide easily across all types of film surfaces, The Green Glider is an absolute must-have for PSV, paint protection and window film applications.

Gator Blade

Our Gator Blade is as sharp as they come, but won't scratch or damage the film. Safer and easier to use than razors, the Gator Blade is fast becoming the choice of installers, applicators and detailers everywhere. You'll find lots of uses for this handy scraper, from cleaning glass, removing excess adhesive to scraping off decals.
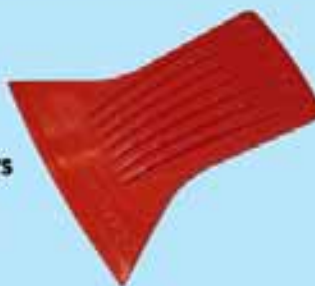

Part# SQGATOR

Contour Squeegee

The Contour Squeegee--A true "must-have" for your tool kit. Just ask any installer who owns one. Designed around the principle that not all squeegees need to be flat, the Contour has curved edges to match all those concave surfaces you deal with on a daily basis, making it a breeze to install everything from window tint, to vinyl graphics, PPF and vehicle wrap. Whether on glass or painted surfaces, Contour hugs the surface evenly while spreading radial pressure outward for quick film adhesion. Plus it has an elongated triangular shape that gets into all those hard-to-reach spots.

Part# CONTOURY

Part# CONTOURP

Part# CONTOURG

- Yellow – our most popular Contour model because it's firm yet flexible
- Green – the softest Contour model, it's ideal for PPF and vinyl graphics and wrap installs
- Platinum – the hardest textured Contour is a firmer card, with a built-in lubrication feature to prevent surface scratches

Doctor Squeegees

Part# SQDOCY

Doctor Squeegees are innovative, multi-purpose squeegees, designed specifically to replace outdated industry tools with modern, hi-tech options. Their unique ergonomic design, comfortable grip handle and quick-change blade system make them as essential to the installation process as stainless cutting blades.

- Red – Soft rubber edge
- Yellow – Semi Firm rubber edge
- Blue – Firm rubber edge

Quick Foot Squeegee

Quick Foot Squeegee - When you need a stiff squeegee with a handle for jobs that require medium reach, Quick Foot is the perfect "in–between" tool. Quick Foot is slim and trim like Slim Foot, but has a shorter, unwrapped handle so it fits more easily in your tool apron. This economically priced hybrid gives you a range of flex rating options to meet a variety of applications.

Part# SQQFOOT

Slim Foot Squeegees

Slim Foot Squeegee - has a soft rubber handle with a long 15 inch reach to get down into back windows. Its slimmer design allows it to get into more spaces, makes it lighter and more economical to boot.

Part# SQSFOOT

Little Foot Squeegee

Little Foot Squeegees - We took the unique blade shape of the Big Foot and removed the handle, to create a series of hard card/squeegee tools that bring a whole new angle to quick and easy applications. Little Foot fits comfortably in your hand, and features an angled, long–reach tip that gets behind gaskets and rubber seals quickly and easily. Measuring about 6 inches along the usable edge, Little Foot's pointed tip lets you squeegee in tight spaces while keeping a firm grip on the tool.

RollePro

ROLLEPRO applicators are designed to roll over vinyl covered rivets and contours in seconds. The Rolle Pro's ergonomic design and specially formulated, heat resistant wheel brings speed and comfort to the once time-consuming application process.

Three Easy Steps:
1. Leave an open un-squeegeed air channel over a row of rivets or around any contoured surface.
2. Use a heat gun to heat the applied vinyl over desired rivet head or convex area to 180 - 200 degrees.
3. Use the RollePro to roll down the vinyl in one smooth motion. The faster, safer, easier way to apply vinyl film over rivets.

Part#: RPRO

Replacement Wheel Part#: RPROW

Wrappers Mobile Table Frame

Our bright purple anodized Wrap Shop mobile tables meet virtually every strength requirement for the sign, graphics and vehicle wrap industry. Easy to assemble anodized aluminum extrusion frame with Heavy Duty caster wheels give you the luxury of laying out all the tools and supplies you need for the day's wrap jobs and then rolling them over to your next vehicle. All 4 wheels lock in to place if a stationary table is desired. Comes in one easy to ship box. All assembly tools are included and it assembles in minutes. Simply assemble the frame, add your own desired table top and bottom shelf (if desired) and you're good to go – roll it anywhere in your shop where working table space is needed! Don't forget the cutting mat on top to protect your table's top surface.

- Door Panel Tool - "U" notch
- Small Molding Tool - "U" Notch Trim & Tack Pry Tool
- Small Molding Tool - "V" Notch Trim & Tack Pry Tool
- Upholstery Tool, hinge side
- Weight: 2.04 lbs.

Part# UTS5

Panel Clip Pliers

For use in most door panel clip removals. These durable panel clip pliers are a must-have tool for vehicle wrap and color change installers looking to get that "is it painted" look! The clip pliers feature a better support under the clip to remove panel clips without damage and a cushion grip handle for comfort. These pliers are suitable for use with Honda, Toyota, GM, Ford and Chrysler vehicles.

Part# PCP

• Cushion grip handle provides additional comfort • Won't damage panel clips
• Use with Honda, Toyota, GM, Ford and Chrysler • Weight: 0.57 lbs.

GoJack

The ImageOne Impact purple GoJak vehicle lift system
Left hand and Right hand units - Vehicles to 6,300 lbs.; Tire widths to 13"

The ImageOne Impact purple GoJak vehicle lift system is sooper heavy duty and built to last! Able to jack vehicle weights to 6,300 lbs. (1,574 lbs. per wheel), including light duty trucks with tire widths up to 13 inches wide and 36 inches tall. This auto jack / dolly system is the most versatile and strongest GoJak® in the line. It has steel rollers, wider axles and two heavy-duty 5-inch diameter, and two heavy-duty 4-inch diameter, double-ball raceway casters. This combination makes for easier rolling with heavier loads. The Model 6313 has a 5-degree offset pedal for additional foot-to-tire clearance. The under frame clearance is increased an additional 2-1/2 inches over other models and brands, which is very useful when pulling cars up flatbed trucks. Available in left and right hand units. Just open the GoJak to slide under the car around each wheel. Flip the lever and press your foot down on the pedal until the cars wheel lifts up off the ground. Once all 4 wheels are up, simply push the car into the location you need it and start your work. Quick flip lever allows you easy incremental lift and drop as needed.
Lift with your leg – effortlessly with just one leg!.

Part #'s sold individually (each):

GOJAKL - Left Hand
GOJAKR - Right Hand
GOJAKS - Rack (Holds 4 Jaks)

Mobile Wrap Tool & Detailers Cart

The ultimate add on to our "Handler" film cutting tool for tint and color change films. Also great for holding all your vehicle wrap tools allowing the wrap technician to bring the cart to the car and keep everything needed close to the job! No more searching for needed supplies. Part# INMDC

The Handler

Part# FH60 60" Wide
FH72 72" Wide

Get serious about minimizing waste and improving efficiencies with Vehicle Wrap Films and Window Tint Films.

Part# FHM6072 ➡

The ImageOne Impact Handler comes in both a 60" and 72" Width and are used by professional Vehicle Wrap Shops and Window Film Installers to reduce waste, and increase speed while cutting down film for installation. Both size Handlers can cut a roll that us up to 60/72" wide accordingly, but can also easily cut a 40" wide roll by adjusting the roller width assemblies. Mostly used during color change wraps and Solar Window Film installations, these machines can also be used by Automotive Window Tint installers to increase efficiency and easily cut films to a specific window or body panel size while minimizing waste Have a left and right body panel or window that's 39" wide? Just set the dual cutters accordingly and pull the film to the length needed. This will allow you to cut both panels exact and leave the largest possible end cut for use on mirrors, interior parts, etc. The Handler has measurements both width and length wise so exact panel measurements are always perfect and always produce minimal scrap pieces possible when used correctly.

Showing The Handler mounted to our Mobile Wrap Tools Cart Using Bracket Part# FHM6072 (not included)

Shown Mounted on a 6 foot Ladder (not included)

Door Jack

There are many adjustment options that Wrap technicians have when working with our Door Jack. The door jack features the industry's only 8-inch front-to-back tilting adjustment, allowing for maximum positioning options for any size or style of front or rear door. The door jack can also be adjusted from 7 inches to 32 inches from the floor, meeting the demands of any sized job as well as wrap technician. The ImageOne Impact Door Jack has a wide stance for added stability and total-lock caster wheels that prevent any movement when locked. Its strong, rubber-padded metal supports also eliminate door damage by preventing metal-to-metal contact. This door jack has a powder coat finished and is backed by a factory lifetime warranty.

Product Details

- Now one tech can handle front and rear doors alone
- Ample padding, no metal-on-metal contact, no damage
- Industry's only 8" front-to-back tilting adjustment
- Side-to-side tilt adjustment for easier part removal & installation
- Wide stance for added stability
- Four industrial grade, easy-glide total-lock caster wheels; zero movement when locked
- Adjusts from 7" to 32" from the floor
- Heavy gauge steel construction
- Powder coat finish
- Lifetime Warranty
- 24"L x 30"W
- 63 lbs

Part# DJACK1

Bumper Jack

This heavy-duty bumper jack will hold any plastic bumper cover without touching the painting surface. Your bumpers are securely held in place by support arms containing a swivel clamp that can move into any position. The protective rubber boots on the support arms help keep critical bumper areas free from scratches. The boots cover bumper areas that tend to swivel, slide, or have threads.
Our bumper jack also features wheel locks that not only keep the wheels from rolling, but prevent the stand stem from swiveling. The five locking positions on the Bumper Jack allow you to wrap the bumper as it sits on the car and also cover hard-to-reach bumper pockets. With unsurpassed durability and versatility, our bumper jack is an excellent addition to any vehicle wrap, restyling and color change shop

Product Details

- Holds any plastic bumper cover without touching the painted surface
- Makes repairs, prep, wrapping and painting faster and easier
- Cover can be rotated 90 degrees to ensure proper wrap application time after time
- Five locking positions
- Protective rubber boots keep critical areas scratch free
- Four industrial-grade, total-lock caster wheels for stability; zero movement when locked
- Three-Year Warranty • 44"W x 30"D x 53"H
- Support arms adjustment from 53"W – 78"W • 37 lbs.

Rivet Wheel

Our Installers Pin Wheels are made of solid stainless steel to withstand all the rigors of an installers daily requirements. This uniquely designed pin wheel allows installers to put air release holes (never use knife slits) into an entire strip of a Big Rig trailer to make your installs much faster and easier than ever before.

Part# RW

DOUBLE Rivet Wheel 2
Double Head Rivet Wheel

Part# RW2

• Speeds vinyl installations on trucks & trailers.
• Creates round air release holes on bubbles/rivets.
• Increase production around rivets by 50% or more.
• Made of solid stainless steel to withstand installers daily use.
• Cut hours of install time!

Installing vinyl over rivets on trucks, machinery, and other metal surfaces is a challenge for all new sign and vehicle wrap installers. In every industry, it is often the simplest of tools that helps get the job done cleanly and efficiently, and the lowly rivet brush is no exception. Made of stiff bristle synthetic fiber, the rivet brush helps form flexible vinyl over the rivet surface. But of course, it's not always that simple. Air pockets between vinyl and raised surfaces are a way of life, and must be removed first, and cold surface and material temperatures must also be dealt with to make the vinyl pliable. Be sure to look at our Rivet Wheels to make your job faster, safer and easier.

Part# RB

rivet **brush**

Mold - N - Hold Black Edge Sealing Tape

• Black, slightly textured, surface gives the illusion of a factory molding finish while it seals your vinyl wraps edges to the vehicle
• Great for fenders, gas cap areas, wheel wells, mirrors, door edges, under head and tail lights, etc.
• Hides vehicles paint showing through on darker wraps in doors seams and body seems.
• Helps prevent "fingering" where vinyl wraps tend to pull back or away from an edge over time.

Note: Always prep surfaces with alcohol prior to application .39" X 25yds. (10mm X 23meters)

Retractable Weeding Tool .030"

Aluminum retractable Bubble Popper Weeding Pen with pocket clip used for making holes, also as a marking point in leather, paper, wood, plastic, etc. .31 x 5in - .8 x 12.7cm Made In USA

Part# WEED30

OLFA Pick-N-Pop Tool

OLFA now offers a high quality tool for the Vehicle Wrap marketplace. The Pick-N-Pop tool is a strong yellow plastic handle with a tapered end on one side that is perfect for picking and lifting rubber window moldings and body panels. The other end offers a brass screw-fitting to insert the included needle for popping bubbles in PSV films or inserting the included 300 mini (4mm) blade. 1-needle and 30 blades and plastic protective/storage case are all included. Great for shop and workbench use as well as on site installations, vehicle wraps, PPF and window tinting.

Part# AK5

The right tool for the job and easy to hang on to since it clips to your shirt pocket like a "ball-point pen". Retracts and protracts like a "ball point pen" also. Use it to put a pin hole (never a knife slit) into your vinyl where a bubble or rivet might be to release the air and flatten the film graphic to the substrate. This tool saves you time and money. Every employee must have one of these. This tool offers an ultra-sharp round tip. Please use caution when using.

Part# SSPT

Part# WCKNIFE

Wrap Cut Knife

The ultimate Vehicle Wrap knife! Made specifically to cut through just the liner side of any pressure sensitive vinyl films. This knife will cut through only the paper backing of a self-adhesive vinyl. No more risk of damaging your film or adhesive or cutting through the film side of your vinyl while on its backing paper. Leaves no marks or cut lines in the film when used properly.

Our Wrap Cut knife is made with a solid steel shaft and protects your graphics and delicate surfaces with our special Teflon coating on the bottom surface of this unique knife, thus allowing the knife to slide across the adhesive side of the vinyl, giving you a clean and easy cut through the backing. Use while film is on the vehicle, boat, etc. or while on the cutting table inside the shop.

This liner cutting knife works anywhere. Works with most adhesive types and all brands of pressure sensitive vinyls and backing papers. Replacement blades available. Ships with 2 extra blades included. Blades have 4 cutting edges per blade.

10-Blade Replacement Pack   Part #: WCBLADE10

WHEN SQUEEGEES AREN'T ENOUGH...

The WrapGlove is specifically made for the Wrap/Decal applicators. They are constructed with these attributes: Conformability, Weave Construction to limit the amount of fabric coming in contact with the adhesive, Durability, Non static properties and finally Lint free so they do not shed when touching the adhesive side of print and color-change films.

Faster, easier wraps and digital media work, guaranteed!

- A unique blend of fibers that has taken years to develop
- They don't shed--no lint or fibers on your adhesive
- They don't transfer your skin's oils
- They can be used to handle the adhesive side of digital and wrap films
- The Fibers are wound tighter providing for a more supple feeling and greater slidability
- Reduce/remove friction when hand cutting vinyl
- Protects graphics when handling
- The Fingertips have been reinforced with a denser weave, providing for better cut resistance and overall durability. All of these improvements make the WrapGlove "Black" the application glove of choice to the Wrap Industry.

Light up your Wrap Work!

WrapHat™

Part# WHV
Open Top WrapHat

LED

* 4 Bright White LED's
* On/Off switch under bill front
* Uses 4 easy to change CR2032 batteries
* Comfortable reinforced sure-dry head band
* Wears like a tennis headband
* Material: Cotton/Polyester blend wicking microfiber
* Closure: 2 piece Velcro strap
* Weight: 3.2 oz
* Light Output: 48 Lumens
* Battery type: CR2032
* Battery Life: Up to 43 Hours

Our WrapHat™ Visor Combines Patent Pending Ultra Bright LED technology with premium Microfiber Visors to provide you with the perfect hands free flashlight. The 4 LED's provide more than 48 Lumens and are concealed under the brim so the hat looks just like any other hat until you need to turn them on. When you do click the easy on/off switch under the brim, you'll notice that 2-3mm wide angle LED's are angled down at 25 degrees to light up where your hands are for close up tasks, while 2-5mm narrow angle LED's are aimed forward to light the distance up to 72 feet away. 4 CR2032 Coin Cell batteries are hidden in the sweatband, provide up to 43 hours of life and are easily replaceable

Part# WHB
Baseball Style WrapHat

LED

* 4 Bright White LED's
* On/Off switch under bill front
* Uses 4 easy to change CR2032 batteries
* Comfortable reinforced & padded head band
* Wears like a baseball hat
* Material: 100% Brushed and Washed Cotton Twill
* Closure: 2 piece Velcro strap
* Weight: 4.2 oz
* Light Output: 48 Lumens
* Battery type: CR2032
* Battery Life: Up to 43 Hours

Our WrapHat™ Baseball Hat Combines Patent Pending Ultra Bright LED technology with premium Unstructured brushed cotton twill baseball style hat to provide you with the perfect hands free flashlight. The 4 LED's provide more than 48 Lumens and are concealed under the brim so the hat looks just like any other hat until you need to turn them on. When you do click the easy on/off switch under the brim, you'll notice that 2 of the LED's are angled down at 25 degrees to light up where your hands are for close up tasks, while the other 2 LED's are aimed forward to light the distance up to 42 feet away. 4 CR2032 Coin Cell batteries are hidden in the sweatband, provide up to 43 hours of life and are easily replaceable.

Part# WHP
SooperBright Pro WrapHat

LED

* 6 Bright White LED's
* 2 on, 4 on, all 6 on, multi-switch under bill front
* Uses 3 replaceable AAA size batteries
* Easy to change batteries
* Comfortable reinforced & padded head band
* Wears like a "conform to your head" round top hat.
* Material: 60% Cotton/40% Polyester Microfiber
* Closure: Velcro strap
* Weight: 10 oz
* Light Output: 60 Lumens
* Battery Life: 117 Hours

Our WrapHat™ Pro hat has the light output of a high quality headlamp (60 Lumens) and integrates it underneath the brim of a high quality, stylish hat. With two 3mm LED's angled down at 25° for close up tasks and four 5mm LED's pointing straight out for distance lighting, you will always have the perfect light no matter what your activity choice. The patented 3 way switch lets you pick each lighting option separately or have all on at the same time for maximum light. 3 AAA batteries are included and provide up to 117 hours of battery life. In case you accidentally leave it on, a built in battery saver feature turns the hat off after 15 minutes of inactivity.

Professional Duty Magnetic Work Gear

MAGNOGRIP™

All our magnetic products are built to satisfy the requirements of the Pro. We reinforce our products with rivets at the key stress points for increased durability. We use double-layered reinforced polyester to achieve a rugged lightweight construction that puts less strain on your back and more muscle into the gear. The Magnet features built into the products enable you to keep OLFA knives, screws and tools close at hand. Use our magnetic wristband to keep tools on your wrist while you work. Finish jobs in less time and with less frustration. Breathable lightweight design allows you to wear the wristband all day long

Magnetic Wrist Band

- Embedded with super strong magnets for holding OLFA SAC1, SVR1, SVR2 and many other metal tools you might need.
- A 3rd helping hand when you need it most.
- Ideal for most vehicle wrap and installation projects.
- Wristband can be attached to ladders, metal shelves, etc.
- Made of durable 1,680-denier ballistic polyester
- Breathable lightweight design.
- One size fits all.

Part# MAGWB

Magnetic Belt Pouch

- Made of durable 1,680-denier ballistic polyester
- Adjustable to left, right or onto another tool case.
- Magnetized to store OLFA knives, small tools and reduce metal fastener spills
- Compatible with most tool belts

Part# MAGBP

Magnetic Belt Clip

- Wristband and belt clip are embedded with super strong magnets for holding screws, wrenches and small tools.
- A 3rd helping hand when you need it most.
- Ideal for many do-it yourself projects.
- Wristband is made of durable 1680D ballistic polyester
- 360° rotational belt clip.
- One size fits all.

Part# MAGBC

Magnetic Suspenders

- Polyester Magnetic Work Suspenders use double-layered reinforced polyester for rugged lightweight construction to put less strain on your back. They are reinforced with rivets at key stress points for increased durability.
- Suspenders include a super strong detachable magnet for holding OLFA knives, screws and small metal tools
- Made of durable 1,680-denier ballistic polyester
- Compatible with most tool belts
- One size fits most
- Adjustable straps
- Built-in cell phone pouch

Part# MAGSUS

100

Infrared Thermometers

The must have tool for vehicle wraps, vehicle graphic installs and outdoor applications. Infrared thermometers do everything from verifying your vehicle's application surface temperature to verifying how hot you are heating your vinyl before and during application.

Simply aim the IR Thermometer at the target, press a button, and read the temperature display. These devices have an optical lens that collects the radiated infrared energy from the object and focuses it on the detector.

The detector then converts the energy into an electrical signal that's amplified and displayed as a temperature reading. An infrared thermometer measures temperature by sensing the magnitude of radiated energy at infrared frequencies.

Infrared Thermometer with Laser

Part #: IRGSL
- Offers Laser Targeting accuracy, enhanced back-lit LCD display and an expanded temperature range of –20°C to 500°C, –4°F to 932°F
- 12:1 Distance to Spot Size
- Compact design is simple to use and easy to store
- Carrying case and 9V battery included - Weight: 1.20 lbs.

Infrared Thermometer with Laser

Part #: IRGATD
- Measurement Range: -60 to 550˚C (-76 to 1022˚F)
- Operating Range: 0 to 50˚C (32 to 122˚F)
- Resolution (-9.9 to 199.9˚C): 0.1˚C/0.1˚F, otherwise 1˚C/1˚F
- Response Time (90%): 1 sec
- 12:1 Distance to Spot Size
- Battery Life: Typ. 18, min 14 hours continuous use - Weight: 1.75 lbs.

Dual Laser Infrared Thermometer

Part #: IRGDL
- Accurately hits your target with dual laser technology.
- Enhanced back-lit LCD Display and an expanded temperature range of -58°F to 932°F (-50°C to 500°C.)
- Compact design is simple to use and easy to store.
- Non-Contact Temperature Range: -50 to 500°C (-58 to 932°F)
- 12:1 Distance to Spot Size
- Display Illumination: Backlit LCD display
- Target Indicator: Dual Laser Spot
- Resolution: 0.5°F / 0.5°C
- Accuracy: ±2°C (4°F) or ±2% of reading
- Response Time: 0.5 seconds
- Power Off: Automatic after 15 seconds
- Battery Life: Approx. 180 hrs.
- Included Accessories: 2 AAA batteries, instruction manual, plastic molded carrying case - Weight: 1.00 lbs.

Infrared Thermometer with Laser

Part #: IRGMINI
- Durable and compact design
- Simple to use
- Laser point sighting
- Large, easy-to-read display
- Instant current and max readings
- 10:1 Distance to Spot Size
- Temperature range: -30° to 500°C (-20° to 932°F) - Weight: 1.00 lbs.

Electrical Heat Guns

Dual Temperature Heat Gun Kit

- Two Heat Settings; 700°F & 925°F
- Watts - 1000 Low/1500 High
- Three Position Rocker Switch; High/Off/Low
- UL & CUL Listed

Includes:
- Dual Temperature Heat Gun
- Reduction Nozzle
- Reflector Nozzle
- Large Deflector Nozzle
- Small Deflector Nozzle
- Black Plastic Case
  Weight: 2.00 lbs.

Part #: HGDT

Ecoheat™ Heat Gun

- Economical, light weight, multi-use heat gun.
- Two heat settings: 500° & 1000° F - Accommodates many automotive and commercial applications.
- Watts - 1200 Max
- Two fan speeds - Low & High (7 & 9 CFM)
- Resettable thermostat - Protects element against overheating
- Lightweight - 1 lb. - Easy to hold at any angle for long periods of time, eliminates operator fatigue
- Built-in hand guard - Protects hand and fingers. Recessed switch guards against knocks and bumps
- UL and CUL Listed
- Thermoplastic housing - for high impact durability
- Built-in Stand - Very stable, allows user to set heat gun down in an upright position. Weight: 1.60 lbs.

Part #: HGECO

Digital Variable Temperature Heat Gun Kit

- "Soft Touch" Control for more exact temperature setting
- High and Low settings each have 6 temp. settings - 12 heat settings total
- Total temperature range from 250°F to 1200°F
- Watts - 1500
- LED Display clearly indicates level of heat emitting
- Patented 80 second automatic cool air flow to prevent accidental burns and to extend life of heating element
- Kit includes four tips and plastic case
  Weight: 3.50 lbs.

Part #: HGDVT

Variable Temperature Heat Gun

- Variable temperature control allows for adjustment of the heat settings
- Total temperature range from 120°F to 1100°F
- Watts - 1550
- Built-in overload protection shuts the heating element down and prevents burn up
- Built-in hang ring adds a convenient storage feature
- Built-in innovative kickstand support provides greater stability and prevents tip over
- Cord Protector keeps the cord from tearing away from the housing
- Ergonomic comfort grip provides greater comfort for long hours of use
- Separate Internal Components allows maintenance on both the motor and the heating element
- Complies with UL, CSA, ANSI standards
- Includes 20mm round and 50mm Flat Nozzle
- High low rocker switch with 16CFM/8.5 CFM air flow
  Weight: 2.10 lbs.

Part #: HGDWT

Installers Pen
Adhesive Primer Applicator Tool

All vehicle wrap professionals know that primer 94 is a must to ensure the longevity and durability of a vehicle graphic. Applying Primer 94 can be a time-consuming and often messy task.....until now. Introducing the Installers Pen by ImageOne Impact, the world's best application tool specifically designed using Primer 94. The Installers Pen is easy to keep in your tool pouch, pocket, tool box, installation vehicle. Fast and easy to use on all your vehicle wrap applications. Work with any brand vinyl film.

- Durable aluminum construction casing
- 2 extra tips included
- The easiest way to apply adhesive primer
- Saves primer & time

Made In the U.S.A.

Part# IPEN

SEALITPEN

Part# SEALIT

Here's a fast, simple answer to your edge sealing problems with outdoor and some indoor vinyl applications that require edge protection from washing, polishing, and excessive physical contact.

Each SEALITPEN is filled with ONE SHOT brand 4005 UV blocker acrylic clear, for a fast drying (15 minutes), long lasting edge seal. Each pen will seal approximately 10 sets of truck doors.

When the time comes to remove the graphics, simply clean the surface with mineral spirits to remove any remaining sealer.

SEALITPEN is compatible with all vinyl, thermal, and digital prints. Simply follow the instructions that are included with each SEALITPEN for your specific application.

Car & Truck Vehicle Outline Collection

mr-clipart

Now over 70,000 vehicle templates are available to vehicle graphics experts worldwide! The combination of an extensive North American as well as European and Asian collection ensures that all customers have all the vehicles they need at their immediate disposal for designing vehicle wraps. With the to-scale vehicle templates 1:20 - scale it takes just a few seconds to design professional vehicle lettering and fulfill the special requests of your customers. The vehicle templates contain all important details, like door opener, fuel cabs, rails and many more details. Additionally a brand-new high-end 3D presentation system converts conventional 2D designs into high-end 3D presentation videos and renderings.
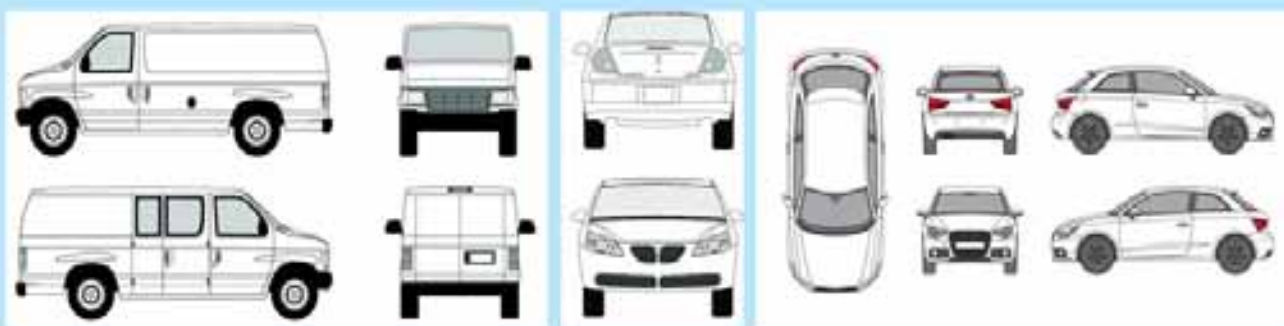

The key benefits:

- 13,000 files represent more than 70,000+ vehicle templates from 20+ years available and constantly growing
- Unlimited download access to all 2D vehicle templates for 365 days in many file formats like CDR, AI, PDF, PSD and more (DVDs are an available option)
- 5 accurate, scaled views including the top views, perfect for vehicle lettering and vehicle wraps
- Download access to all 3D models for 365 days in various 3D file formats

WRAP VIDEOS

VIDEOS By Justin Pate

3-Pack Bundle

Part# JPDVD3PK

This is a very well-produced HD DVD set of real wrap lessons that simply work great; by one of the most experienced wrap installers in our industry. Study Justin Pate's unique "UGIS" system. Your wraps will become easy, less challenging and more fun, and even more important, more durable and attractive. These DVD's put it all together at your fingertips. It's not just how to install a wrap. It is from preparation to post heating, showing "all the RIGHT things to do". Believe me, out of all the wrap instructional videos out there, Justin Pate's are well worth every penny.

WARNING: Don't wrap a vehicle without watching these DVD's!

Liner Cutting Tools
for Cut-and-Peel Graphics and Labels

Alumalite HD Liner Cut Tool

The Alumalite HD Liner Cut tool is a precision, hand-held device utilizing a standard single edged razor blade. The blade depth adjustment is as simple as using a screw driver, which can control the depth of cut to less than a thousandth of an inch. The blade can be mounted on either side of the unit, for either left hand or right hand operation. The blade is on the outside surface of the Alumalite HD Liner Cut tool so that it is in contact with your safety ruler or straight edge, giving you the perfect cut where you want it.

Note: The Alumalite HD Liner Cut is a precision instrument. Do not drop or place blade edge down on a hard surface. With just a little practice, the Alumalite HD Liner Cut tool will give faster, squarer, more accurate and controlled depths of cut.

Part# ALHDLCT

Replacement blades Part# 650506 / 100 Pack Dispenser

Pocket Liner Cutting Tool

This smartly engineered, innovative tool offers a unique way to cut only the liners of your substrates and not the film. The auto Pressure Control System adjusts the cutting pressure to help prevent damage to the material beneath.
The tool contains an easy sheet thickness adjustment - simply set from "MIN" for cutting a thin sheet, to "MAX" for cutting a thicker sheet of material. The user does not need to exert any pressure adjustments during the cut.

The Pocket Liner Cutting Tool cuts up to 90lbs liner & individual sheet stock up to 0.004" (0.1mm) thick. It cuts effortlessly through newsprint, paper, cardstock, thin films, plastic sheets, and tape.

Replacement blades Part# LCTB / 5 Pack

Part# LCT

MAKES CUT-N-PEEL LINERS

Just set the blade depth on the side of the knife. Then press onto the liner of any brand of vinyl film and drag the knife blade across the liner

Cuts newsprint, paper, cardstock, thin films, plastic sheeting and tape.

Economy Liner Cut Tool

This disposable simple and easy to use tool works by pushing the bottom portion of the tool underneath the liner (in-between liner and adhesive film) and then pushing through to the end of your cutting needs. This tool will continue to slightly separate the liner from the adhesive film but cut only the liner as it is pushed through.

Part# LCTECO

Colors may vary, no color choice available.

Wrap Cut Knife

Part# WCKNIFE

The ultimate Vehicle Wrap knife! Made specifically to cut through just the liner side of any pressure sensitive vinyl films. This knife will cut through only the paper backing of a self-adhesive vinyl. No more risk of damaging your film or adhesive or cutting through the film side of your vinyl while on its backing paper. Leaves no marks or cut lines in the film when used properly.

Our Wrap Cut knife is made with a solid steel shaft and protects your graphics and delicate surfaces with our special Teflon coating on the bottom surface of this unique knife, thus allowing the knife to slide across the adhesive side of the vinyl, giving you a clean and easy cut through the backing. Use while film is on the vehicle, boat, etc. or while on the cutting table inside the shop.

This liner cutting knife works anywhere. Works with most adhesive types and all brands of pressure sensitive vinyls and backing papers. Replacement blades available. Ships with 2 extra blades included. Blades have 4 cutting edges per blade.

10-Blade Replacement Pack   Part #: WCBLADE10

Snappy Cutter

Part# SCUT

One of the most versatile tools ever designed for cutting paper, cloth and plastic films. A Standard double edge razor blade is locked securely in the plastic handle. Slip the foot of the tool under the material to be cut and push for an easy, clean cut. Plastic handled media slitter, used as extra insurance while on a wrap install that you won't scratch the vehicle or accidentally cut your vinyl while trying to remove the backing page. A great little tool to have around the shop and in your tool box.

*Pen*BLADE®

Medical Grade (non-sterile) Super Sharp Cutting Knives

Finally... Performance Meets Safety

With its unique, disposable pen-like design and retractable safety blade, Penblade knives are a cut above the rest. Medical grade non-sterile super sharp blades offer extra-long life and exceptionally easy cutting of vinyl, banner, PPF, window tint films and most rigid sign substrates as well.

3 Blade styles to choose from.

GYRO-CUT® Craft and Hobby Tool

The amazing GYRO-CUT® craft and hobby tool is designed to easily cut thin sheet materials such as paper, thin card up to 240gsm, vinyls, thin mylar sheet, masking material, decoupatch, etc. This hand-held tool has a 360 degree rotating blade which enables you to cut very complex shapes easily and quickly.

The ergonomically designed handle is comfortable for both right-and left-handed use. Unlike other craft knives, the GYRO-CUT® blade will not readily cut human skin in normal use, making it a much safer alternative to scalpels and scissors.

Applications include paper-cutting, decoupage, stencil-making, paper- crafting, scrapbooking, card-making and many other uses. The special blade technology allows you to cut straight lines using a plastic ruler and curved lines using a French curve or other types of templates. GYRO-CUT® is also perfect for cutting freestyle shapes; it allows you to be as creative as you like while cutting paper and other materials.

Replacement blades are available in packs of two.

Foamboard Freestyle Cutter

FoamWerks™

Part # WB-6020

Cut freeform shapes with this innovative push-style cutter. Easy to use, just insert the blade into the foamboard and push to follow the desired shape. Features ergonomic handle, on-board blade storage compartment, blade safety shield and two blades. Cut up to 3/16" thick foamboard. Use replacement blades WB-5 or WB-20.

Foamboard Straight/Bevel Cutter
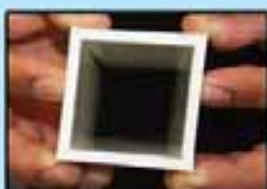

FoamWerks™

45 Bevel Cutter – two useful tools combined in the FoamWerks Foamboard Straight/Bevel Cutter. Simply rotate the angled base block and Model WC-6010 transforms from a straight cutter to a 45 degree bevel cutter. Great for butting 2 sheets of foam board together with invisible seems. Features include adjustable blade depth, ergonomic handle and on-board blade storage. The Straight/Bevel Cutter includes two blades and can be used with any suitable straight edge. Use replacement blades WC-20 or WC-50

Part # WC-6010

Foamboard Rabbet Cutter

FoamWerks™

Part # WC-4010

Create perfect adjoining foamboard joints with FoamWerks Foamboard Rabbet Cutter. The innovative ergonomic construction and dual blade action create one-stroke finished results. WC-4010 also features on-board blade storage and includes two blades. Use as either a right-handed push style or left-handed pull style action. Use replacement blades WC-20 or WC-50.

124

Foamboard V-Groove Cutter

FoamWerks

Part #
WC-2001

Cuts up to ½" thick soft materials. Use foamboard under material to be cut as an underlay (not directly on cutting mat). Cutting mats and hard surface table tops are too dense for the blade to cut into and puts far more stress on the tool than what it was designed for. Cuts paper, vinyl, banner, and soft center foamboards. Gives you maximum cutting effort with minimal effort—simple press and pull operation

`Use replacement blades WC-20 or WC-50.

Works with our safety rulers!

Foamboard Straight Cutter

FoamWerks

Part #
WC-6001

Cuts up to ½" thick soft materials. Use foamboard under material to be cut as an underlay (not directly on cutting mat). Cutting mats and hard surface table tops are too dense for the blade to cut into and puts far more stress on the tool than what it was designed for. Cuts paper, vinyl, banner, and soft center foamboards. Gives you maximum cutting effort with minimal effort—simple press and pull operation

`Use replacement blades WC-20 or WC-50.

Works with our safety rulers!

Channel Rail

Part # W-3001

FoamWerks

Aluminum 32" rail features channel rail on one side and dual scale on the other.
Channel rail is compatible with FoamWerks Straight Cutter and V-Groove Cutter.

Foamboard Circle Cutter

FoamWerks

Part #
WA-8001

Cut perfect circles from 1" to 6" diameters. Center depth indicator shows blade progression for board depths from 1/8" to 1/2". Features dual inch/metric rail, centering pin, magnetic blade slot and clear acrylic safety dome. The circle cutter includes five blades.

Use replacement blades WA-5 or WA-20

CORO *Cutter*

The best knife for cutting corrugated plastic sheeting.

- **Lifetime Warranty!**
- **Never needs sharpening!**
- **Rust proof stainless steel!**
- **Compact and easy to use!**
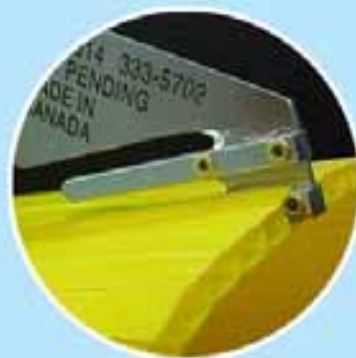

Part # COROCUT

Snappy *Cutter*

Part# SCUT

One of the most versatile tools ever designed for cutting paper, cloth and plastic films. A Standard double edge razor blade is locked securely in the plastic handle. Slip the foot of the tool under the material to be cut and push for an easy, clean cut. Plastic handled media slitter, used as extra insurance while on a wrap Install that you won't scratch the vehicle or accidentally cut your vinyl while trying to remove the backing page.
A great little tool to have around the shop and in your tool box.
